gas grill with
smart thermometer
and tank sensor

1 download the app

Download the Kenmore Smart™ app to your device and create a profile.

Visit Kenmore.com/smart for additional details.

2 select

A. From the Home screen Tap the (+) to add a new product.

B. Tap on the  icon.

C. Turn on the thermometer and tank sensor. Press and hold the thermometer power button for two seconds.

hint | Make sure all devices are powered on. Confirm that Bluetooth is enabled on your smart device.

3 pair

A. Kenmore Smart app will scan for devices.

B. Once the app syncs with your grill, press the button on the thermometer, and then name your grill.
For Android users, pull down to refresh after naming the thermometer.

4 set up is complete

Reminders:

Both thermometer and tank sensor must be powered on to view tank sensor data. Confirm batteries are installed correctly and sufficiently charged.

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
