

Press the startup button (with side stand retracted) and the READY lamp on the instrument board will light.

Operation of Smart Remote Controller

With advanced smart remote controller, CR6 electric motorcycle can be locked or unlocked easily by pressing buttons on the remote controller within 30m.

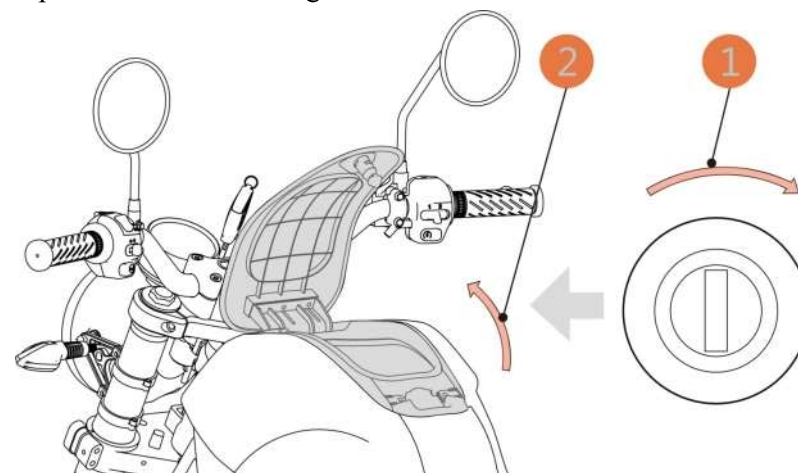

1. Button for physical key. Press to pop out the physical key.
2. Defense button: slightly press to allow the vehicle to enter anti-theft alarm state.
3. Defense cancel button: slightly press to release the vehicle from anti-theft alarm state.
4. Vehicle seeking button: press the button and the vehicle will sound for warning and seeking purpose.
5. Startup button: double click; the vehicle can turn on the whole-vehicle power supply without key.

How to operate physical handle lock

1. After the power is cut off, turn the handle to the most left, insert the key into the physical lock of the head lock, press down and rotate the key to position 1 to lock the head direction lock; turn the key to right directly to the power-off position 2 to start the vehicle.
2. Insert the key into the handle lock and turn right to power-off position 2; the head direction lock can be turned on. At this moment, the electrical system is off.
3. Continue to turn the key right-ward to position 3, the electrical system is on for self-test and the vehicle is stand by.

Open and close the storage box

- French:

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

(1) l'appareil ne doit pas produire de brouillage, et

(2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le

brouillage est susceptible d'en compromettre le fonctionnement.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
