Projector Overview

1. Connecting the projector to power

a. Connect the power cable to the projector.

b. The projector will display an indicator light when connected to power.

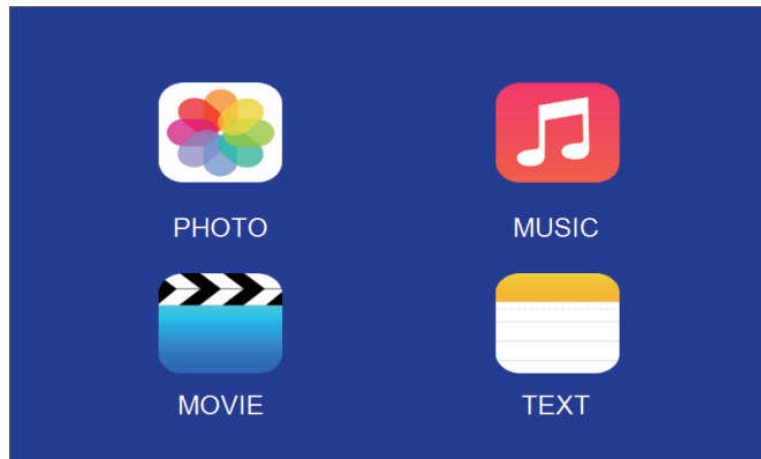

2. Power ON/OFF

Press the “” button on the projector or on the remote control to power on. After the projector gets power through the power cable, it goes into stand-by status.

3. Multimedia boot screen

After 5-10 seconds, the multimedia screen will be displayed.

4. Focus & Keystone correction

a. Manual keystone correction (Maximum: $\pm 15^\circ$)

Slowly move the keystone correction ring on the top of the projector until the image change to be a rectangle.

This should normalize the display image.

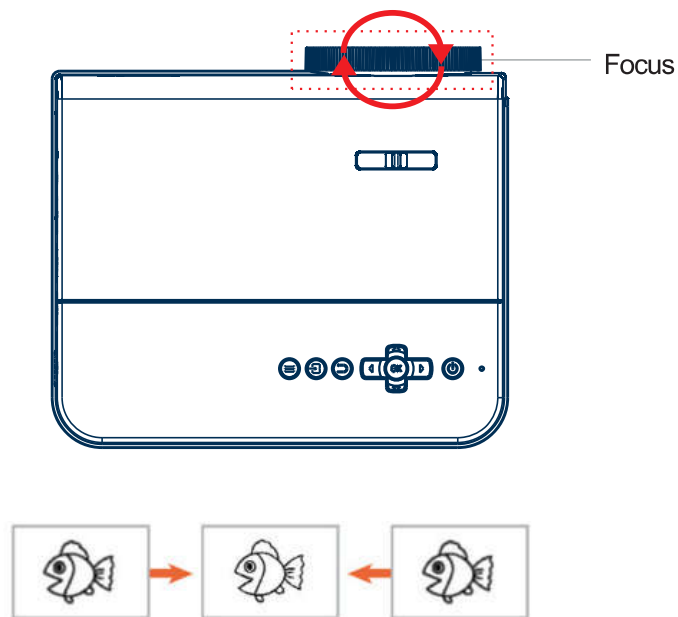

Make sure the projector is horizontal to the projector screen.

b. Focus adjustment

Make sure the projector is horizontal to the projector screen. Rotate the focus ring slowly, at the same time check the focus point carefully. The best focus point for the lens would be where the image is most clear.

Note: The minimum projection distance is 1.35 meters.

Make sure the projector is horizontal to the projector screen.

Connections

Different interfaces introduce

Connect multiple devices and applications.

Screen Mirroring

iOS screen (ios devices have 2 methods to connect)
 1) Wireless connection with WiFi router (for iOS devices)
 (Recommended)

Step 1: Click "⊕ Source" button and choose "Screen Mirroring",
 enter the "Setting" mode and select the "Wi-Fi search" function,
 connect the router that you wanted and put in passwords.

Step 2: Open your smartphone's Wi-Fi and connect to the same router.

Step 3: At the same time, make your smartphone turn on the "screen mirroring"
 function, in this way, you can start to operate as you like.

Menu	Content
WiFi	Connect the projector to Wi-Fi router
Reset	Restore the Screen Mirroring function factory Settings
OTA	Online upgrade
Mirror Setting	Mirror mode/Airplay mode

2) Wireless connection without Wi-Fi router (for iOS devices)

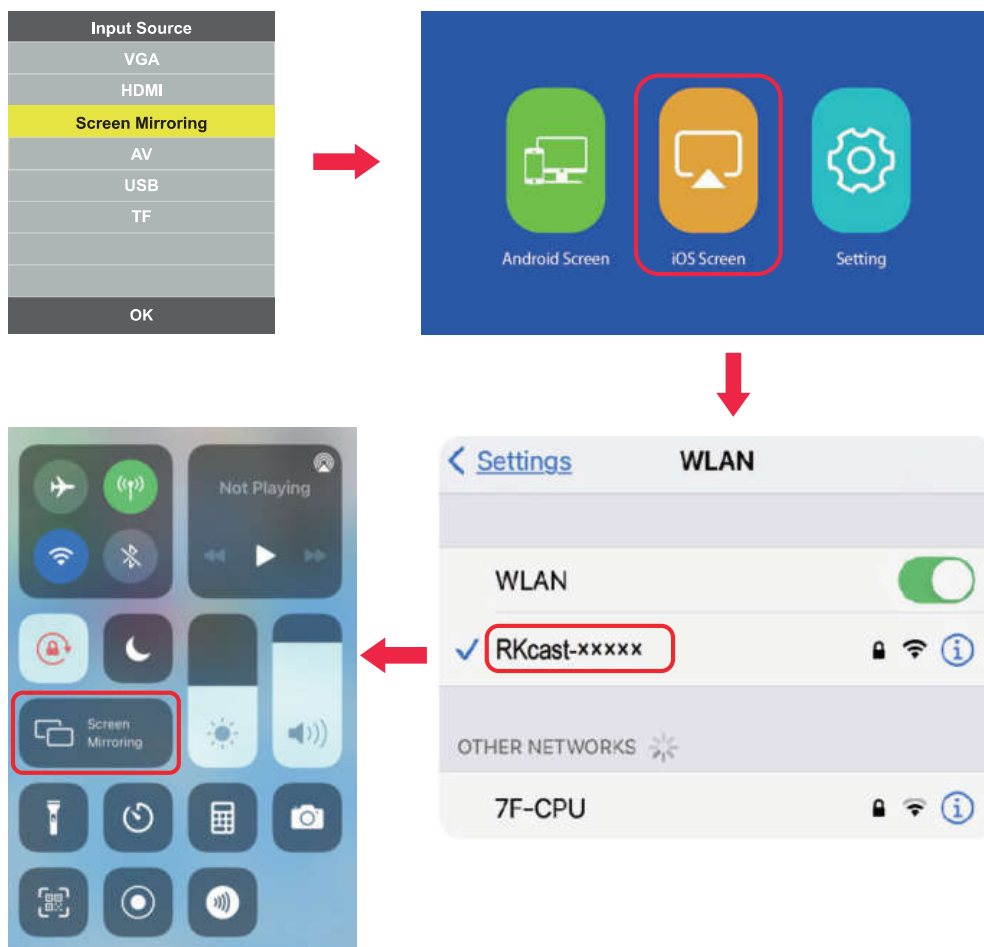

Step 1: Projector doesn't need to connect to the WiFi router.

Step 2: Click the "Source" button and choose the "Screen Mirroring" with "iOS Screen" (you can see the projector's name and password when you choose ios screen mirroring on the projector).

Step 3: Turn on Wi-Fi on your iOS device and search for the network name of the projector and put the password into connecting, it will show connect

Step 4: Turn on the "Screen Mirroring" function on your iOS device, select the device name of the projector.

Step 5: After the above steps,you can play the video of your mobile phone synchronously.

Android screen

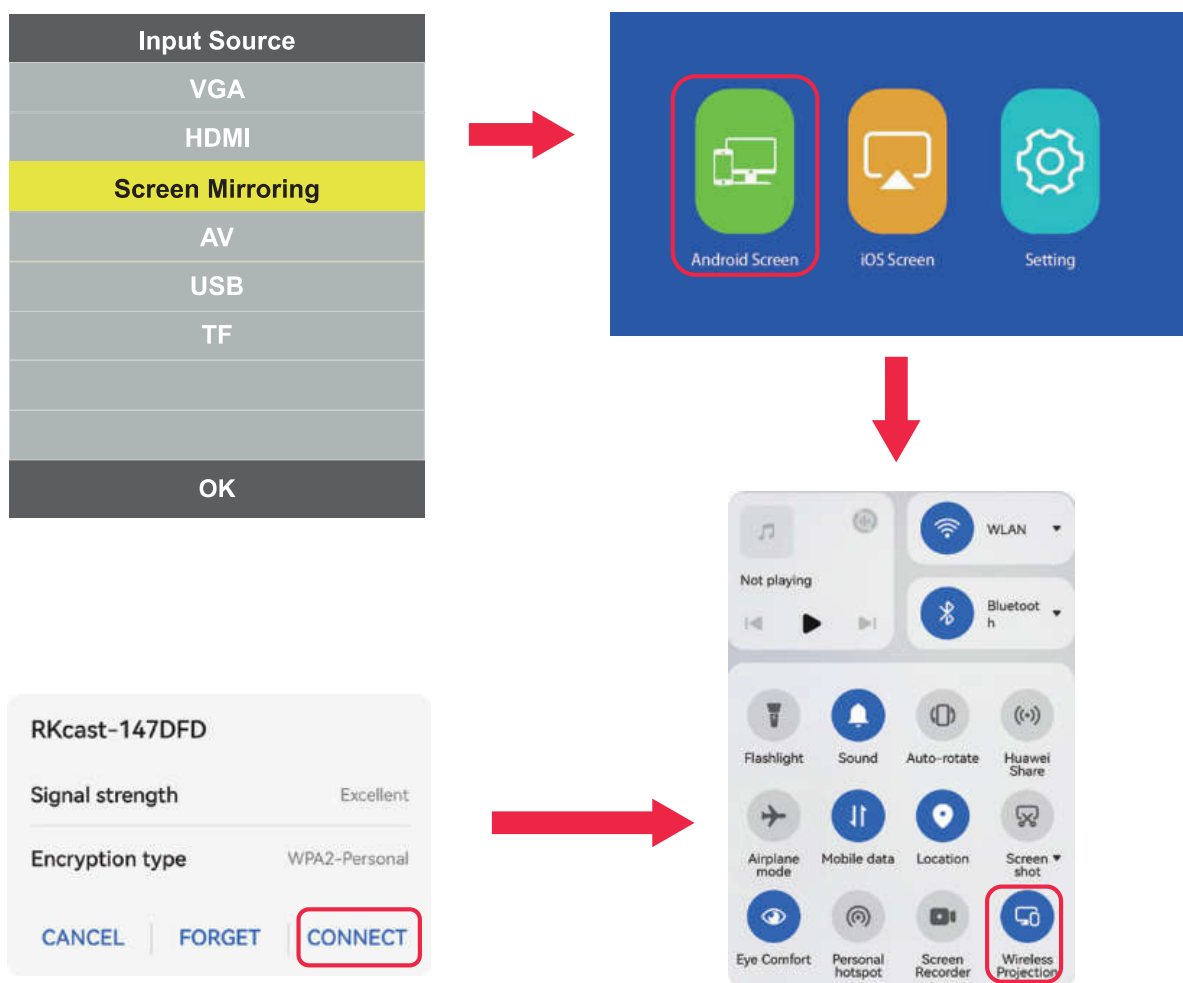

Wireless connection for Android devices (Recommended)

Step 1: Click the "  Source" button and choose the "Screen Mirroring" function.
(enter "Android Screen" and you can see the projector's name and password when you choose screen mirroring).

Step 2: Turn on Wi-Fi on your Android device (No Wifi connection required) of the projector and put the password into connecting.

Step 3: Turn on the " Wireless Projection " function on your Android smartphone, select and connect that device name of the projector.

Step 4: Now you can start to use the screen mirroring function with your phone.

Note:

- Some Android devices may not support screen mirroring due to the compatibility."
- Some Android devices may only transfer the display without audio due to the protocol restrictions.

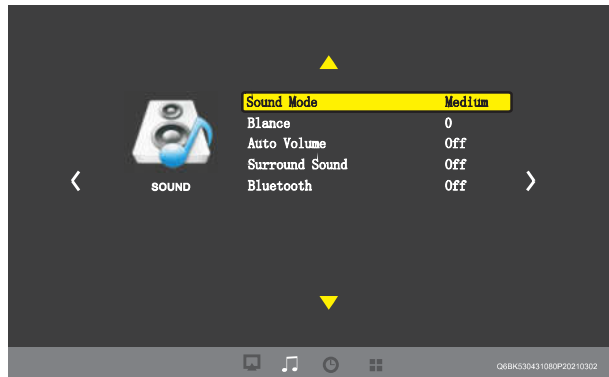

Due to copy right issues, Netflix, Hulu and Disney are prohibited from playing movies from wireless projection. But It is absolutely okay to play copyright-free videos.
