Takes photos and videos.
**15>Macro Camera(2MP).**
16>Air Pressure Balance Hole.
17>LED.
LED flash light.

GETTING STARTED

Waterproof warning:
1. AGM_H6 is IP68/IP69K/MIL-STD-810H certified.
2. USB waterproof rubber cover and SIM/SD tray waterproof rubber cover must be completely closed to prevent water damage.
3. If the phone does come in to contact with water, it may affect the audio for a short period. In this case please dry the phone using a clean cloth and then allow it to stand and dry naturally for 30 minutes. This should restore the audio to the correct position.
4. Please do not use any other method, hairdryers for example, other than that listed above to dry your phone as this will affect the phone performance.

Installing the SIM and Micro SD card:
1.Pull out the SIM card tray with your finger.
2. Place Nano-SIM in inside position.
3. Place Micro SD card in outside position.
4. Make sure that the Nano-SIM and Micro SD card the cut corner aligned with tray in the correct position as per the diagram shown above.

NOTE:
1. The AGM_H6 supports dual SIM dual standby but single pass. This means that you cannot use both SIM cards for calls or data services simultaneously.
2. A cut SIM card or any other non-standard cards are not allowed. Those non-standard cards may not be recognized by the phone and can damage the tray.
3.*After you insert the card, communication and network services require support from the operator. Any expenses incurred for calls, data, and other services will be charged by the operator corresponding to the card you have chosen.
*Your network usage status and the services you can enjoy depend on the deployment status of the operator you have chosen in the local area.

BATTERY AND CHARGING

Note: The AGM_H6 battery is not removable.
Standby time:
1. The AGM_H6 standby time is dependent on different working environments.
2. AGM_H6 receiving a weak network signal and operating at low temperature will have a shortened standby time.
Screen brightness, system settings, games, music, video, location services, camera, Bluetooth, Wi-Fi and applications consume the most battery power.

Charging the Phone:
1. Open the USB Type-C port cover and connect the USB power cable to the port. Be careful not to use excessive force when plugging the cable. Any damage caused by attempting to insert the connector incorrectly is not covered by the warranty.
2. Connect the USB power cable to the charging power adapter.
*AGM_H6 supports CE/CB/FCC/EAC or equivalent certified chargers. The recommended charger output is 5V/2A.Uncertified equipment may cause damage to the device or cause batteries to explode.
3. Plug the charger into an AC mains socket.
4. When charging is complete, remove the cable from the device.
*Close the USB port cover on the device.

USB Type-C

Tips:
1. The optimum working temperature for the AGM_H6 is from 0°C~40°C. Charging the PAD outside this temperature range will damage the battery and shorten battery life.
* Please do not charge the Phone under extremely low or high temperature, Please charge the phone under 5°C~40°C. Otherwise the battery will be damaged or exploded.
2. Please use the certified charger and cable to ensure maximum performance and safety.

3. Please note that the battery will still discharge itself even when the Phone is not in use and switched off. If you plan to not use the unit for an extended period, you should still charge it a least every two months to prevent complete power loss and to protect your data.

FREQUENTLY USED FUNCTIONS

Lock/Unlock the screen:
Press the POWER key.
The phone screen will be locked when the phone is not in use.
