Solder Board-Component View 9	 A photograph showing the solder side of a green printed circuit board (PCB) component. The component has two circular surface-mount components, likely antennas, and a small connector with three colored wires (red, yellow, and black) extending from it. The component is placed on a blue textured surface next to a black L-shaped ruler with white markings in millimeters and centimeters.
Antenna View	 A photograph showing the antenna side of the same green PCB component. A red rectangular label with the text "5.8G Antenna" is placed on the component, with a red line pointing to one of the circular antenna elements. The component is surrounded by several small yellow surface-mount components. It is placed on a blue textured surface next to a black L-shaped ruler with white markings in millimeters and centimeters.
