

Date: 04/04/2022

FCC ID: 2A3LJ-MAMWLE

IC: 28058-MAMWLE

To whom it may concern:

The requirements of KDB 996369 has been met and shown on the following statements.

Type of Module: Single Modular Transmitter			
No.	Requirements	Device Conditions	Comply (Y/N)
1	The radio elements of the modular transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements.	The module is equipped with RF shielding cover. Please refer to external photos.	Y
2	The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part 15 requirements under conditions of excessive data rates or over-modulation.	All the module inputs are buffered by the on-board microcontroller. There is no possibility for the end user to have direct control on the transceiver. Please refer to block diagram and schematics.	Y
3	The modular transmitter must have its own power supply regulation.	The module is based on STM32WLE microprocessor, which is equipped with its own DC-DC power regulator. The rated voltage is 3.3V. Please refer to block diagram and schematics.	Y
4	The modular transmitter must comply with the antenna and transmission system requirements of §15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a “unique” antenna coupler.	The module is fully compliant with FCC rules. Please refer to external photos.	Y
5	The modular transmitter must be tested in a stand-alone configuration, i.e., the module must not be inside another device during testing for compliance with part 15 requirements.	The module was tested in a stand-alone configuration. Please refer to setup photos.	Y
6	The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	Every module is labeled during manufacturing. Please refer to label photos.	Y
7	The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization.	The module is compliant with all applicable FCC rules. Please refer to user manual.	Y
8	The modular transmitter must comply with any applicable RF exposure requirements in its final configuration.	The module complies with applicable RF exposure requirements. Please refer to Test Reports.	Y

If you have any questions regarding this, please don't hesitate to contact us.Sincerely,
