EN

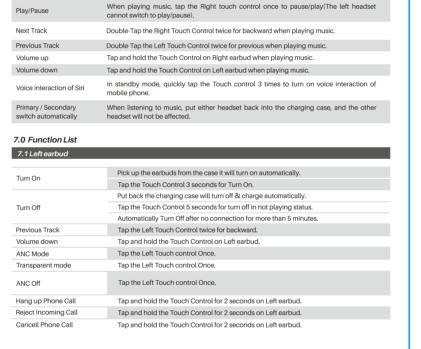

TOZO° ΕN 4.1 Active Noise Cancellation Mode (ANC Node) $With \ Active \ Noise \ Cancellation, an outward-facing \ microphone \ detects \ external \ sounds, \ which \ your \ TOZO \ NC9 \ earbuds$ then counter with anti-noise, canceling the external sounds before you hear them. An inward-facing microphone listens inside your ear for unwanted internal sounds, which your TOZO NC9 earbuds also counter with anti-noise. ANC Active noise cancellation 4.2 Transparency Mode ansparency mode can enhance the voice frequency band and imp the perception of the surrounding sound, so you can hear what's going on around you with out taking off the earbuds. Active Noise Cancellation and Transparency mode work best when your TOZO NC9 fit well and wearing correctly. 4.3 ANC Off Mode ANC Off Mode is the default mode. 5.0 BOX Wireless Charging Designed for the modern life, never be strangled by headphone cables. Enjoy the convenience of wireless charging and free charging devices provided by airports, hotels, and café shops around the world. (Wireless Charging Pad Not Included)

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- -Reorient or relocate the receiving antenna.
- -Increase the separation between the equipment and receiver.
- -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -Consult the dealer or an experienced radio/TV technician for help.
