<p><b>Solder Board-Component View 4</b></p>	 <p>A photograph of a white rectangular solder board component. The component has several circular solder pads on its surface, some of which are populated with small components. A black L-shaped ruler is placed next to the component for scale, showing measurements in millimeters. The ruler indicates the component is approximately 100 mm wide and 50 mm high. The background is a blue textured surface.</p>
<p><b>Solder Board-Component View 5</b></p>	 <p>A photograph of a green rectangular solder board component. The component has a central rectangular area with a dark, possibly soldered, component. A black L-shaped ruler is placed next to the component for scale, showing measurements in millimeters. The ruler indicates the component is approximately 50 mm wide and 20 mm high. The background is a blue textured surface.</p>

<p><b>Solder Board-Component View 6</b></p>	 <p>A photograph showing a small green printed circuit board (PCB) component. The component is rectangular with rounded corners and contains several small electronic components, including a central integrated circuit (IC) and several surface-mount components. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component positioned between the 10 mm and 30 mm marks.</p>
<p><b>Solder Board-Component View 7</b></p>	 <p>A photograph showing the same green PCB component from a different perspective. This view highlights a large, rectangular component mounted on the board, which appears to be a connector or a specialized IC. The component is black and has a metallic base. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component positioned between the 10 mm and 30 mm marks.</p>
