

<p style="text-align: center;"><b>Solder Board-Component View 7</b></p>	 <p>A photograph of a blue printed circuit board (PCB) component, labeled 'Solder Board-Component View 7'. The board is positioned vertically on a blue textured surface. A black ruler with white markings is placed horizontally on the left side of the board, showing measurements in millimeters from 0 to 100. The board features a USB-A port on the left, a USB-C port on the right, and a central rectangular component. Various electronic components like resistors and capacitors are visible on the board. Text on the board includes 'LT-A15-10 USB V01' and '2021-07-03'. The board is oriented vertically with the USB-A port at the top.</p>
<p style="text-align: center;"><b>Solder Board-Component View 8</b></p>	 <p>A photograph of a blue printed circuit board (PCB) component, labeled 'Solder Board-Component View 8'. The board is positioned vertically on a blue textured surface. A black ruler with white markings is placed horizontally on the left side of the board, showing measurements in millimeters from 0 to 100. The board features a USB-A port on the left, a USB-C port on the right, and a central rectangular component. Various electronic components like resistors and capacitors are visible on the board. Text on the board includes 'LT-A15-10 USB V01' and '2021-07-03'. The board is oriented vertically with the USB-A port at the top.</p>

<p style="text-align: center;"><b>Solder Board-Component View 9</b></p>	 A photograph showing a blue printed circuit board (PCB) component mounted on a white solder board. The component is labeled "MP3-LT001 LED" and "U1.0-178788". It features several surface-mount components, including a black integrated circuit and a small black component. The assembly is placed on a black ruler with white markings for scale, and the background is a blue perforated mat.
<p style="text-align: center;"><b>Solder Board-Component View 10</b></p>	 A photograph showing a black PCB component with a digital display and a USB port mounted on a white solder board. The component is labeled "CARD USB RECO REPAIR" and features a four-digit LED display. It is placed on a black ruler with white markings for scale, and the background is a blue perforated mat.

<p><b>Solder Board-Component View 11</b></p>	 <p>A photograph of a green PCB component with multiple rows of soldered pins. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the top edge marked from 10 to 80 and the bottom edge marked from 20 to 100. The component has several rows of pins, some of which are soldered to the board. A white ribbon cable is connected to the right side of the component.</p>
<p><b>Solder Board-Component View 12</b></p>	 <p>A photograph of a yellow PCB component with various electronic components. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the top edge marked from 10 to 80 and the bottom edge marked from 20 to 100. The component features several LEDs, resistors, and a small battery. Text on the board includes "MX-3686-01a&lt;2021.7.3.3" and "轻触6X6X5-4 Q3散光蓝光灯x4个". A white ribbon cable is connected to the left side of the component.</p>

<p style="text-align: center;"><b>Solder Board-Component View 13</b></p>	 <p>A photograph showing the front view of a green printed circuit board (PCB) component. The board is populated with three RJ45 network ports, each with a clear plastic RJ45 jack. A small black component, likely a microcontroller or IC, is mounted on the board. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm. The board's dimensions are approximately 40 mm wide and 60 mm high.</p>
<p style="text-align: center;"><b>Solder Board-Component View 14</b></p>	 <p>A photograph showing the back view of the same green PCB component. The reverse side of the board is populated with numerous surface-mount components, including resistors, capacitors, and integrated circuits. The board is placed on the same blue textured surface next to the same black ruler. The ruler shows measurements from 0 to 100 mm. The board's dimensions are consistent with the front view, approximately 40 mm wide and 60 mm high.</p>
