

<p style="text-align: center;"><b>Solder Board-Component View 7</b></p>	 <p>A photograph of a yellow printed circuit board (PCB) with various electronic components. The board is placed on a blue textured surface. A black ruler with white markings is positioned vertically on the left side of the board, showing measurements in millimeters. The components on the board include several resistors, capacitors, and integrated circuits. A black component is visible on the right side of the board.</p>
<p style="text-align: center;"><b>Solder Board-Component View 8</b></p>	 <p>A photograph of a green printed circuit board (PCB) with various electronic components. The board is placed on a blue textured surface. A black ruler with white markings is positioned vertically on the left side of the board, showing measurements in millimeters. The components on the board include several resistors, capacitors, and integrated circuits. A black component is visible on the right side of the board.</p>

<p style="text-align: center;"><b>Solder Board-Component View 9</b></p>	 A photograph of a yellow PCB populated with various components including resistors, capacitors, and push buttons. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows dimensions in millimeters, with the board's length being approximately 100mm. A black ribbon cable is connected to the right side of the board. Text on the board includes 'WALTEK', 'W22X02025349W', 'PB-5511-XH', and labels for 'KEY1', 'SCN', 'REC', and 'MODE' buttons.
<p style="text-align: center;"><b>Solder Board-Component View 10</b></p>	 A photograph of the reverse side of the PCB, showing the green solder mask and numerous silver solder joints. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows dimensions in millimeters, with the board's length being approximately 100mm. A black ribbon cable is connected to the top edge of the board.
