

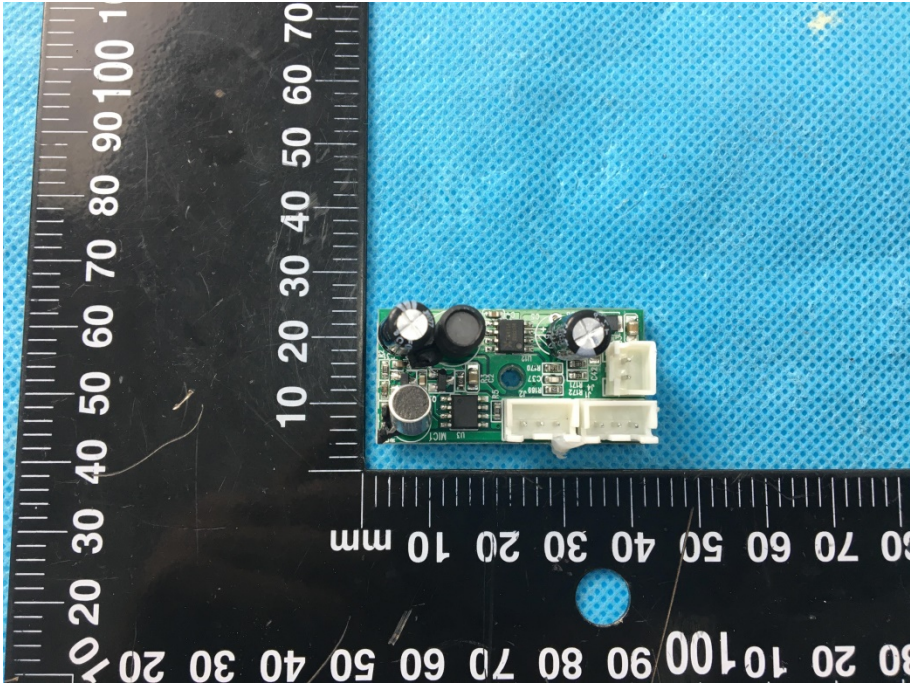

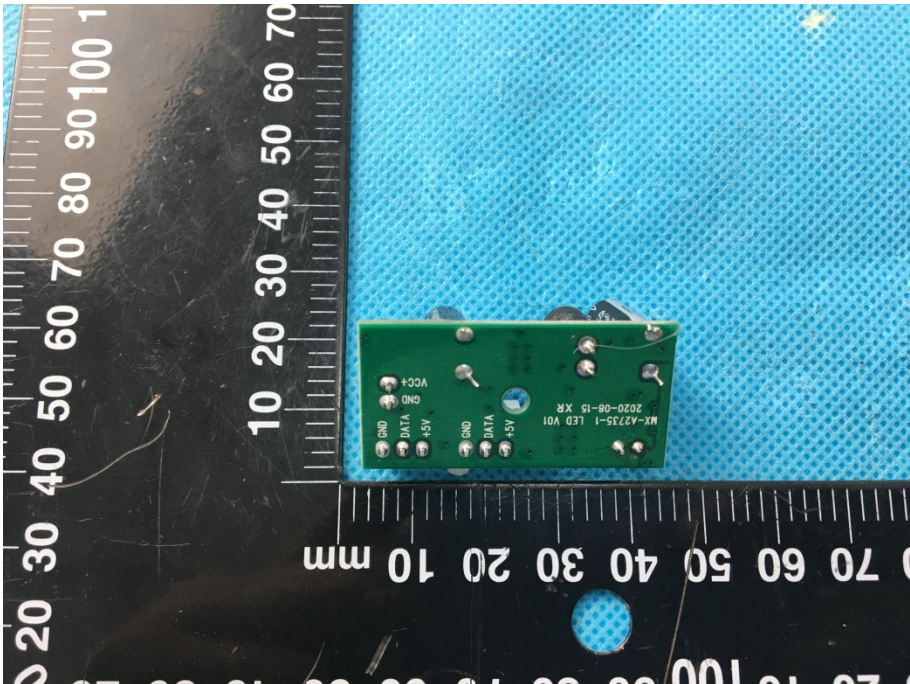

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

**EUT Housing and Board  
View 1**

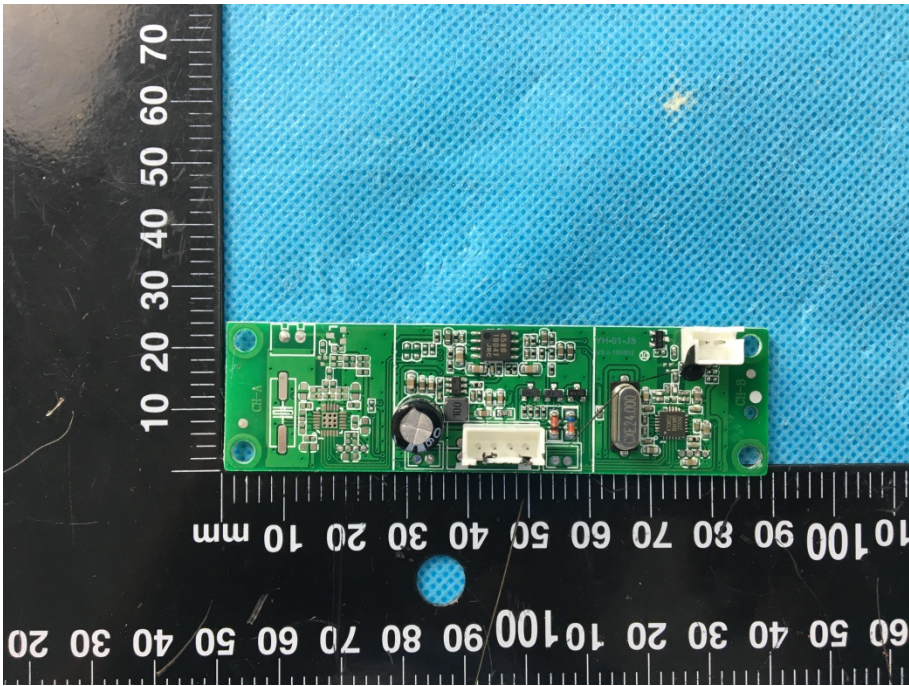

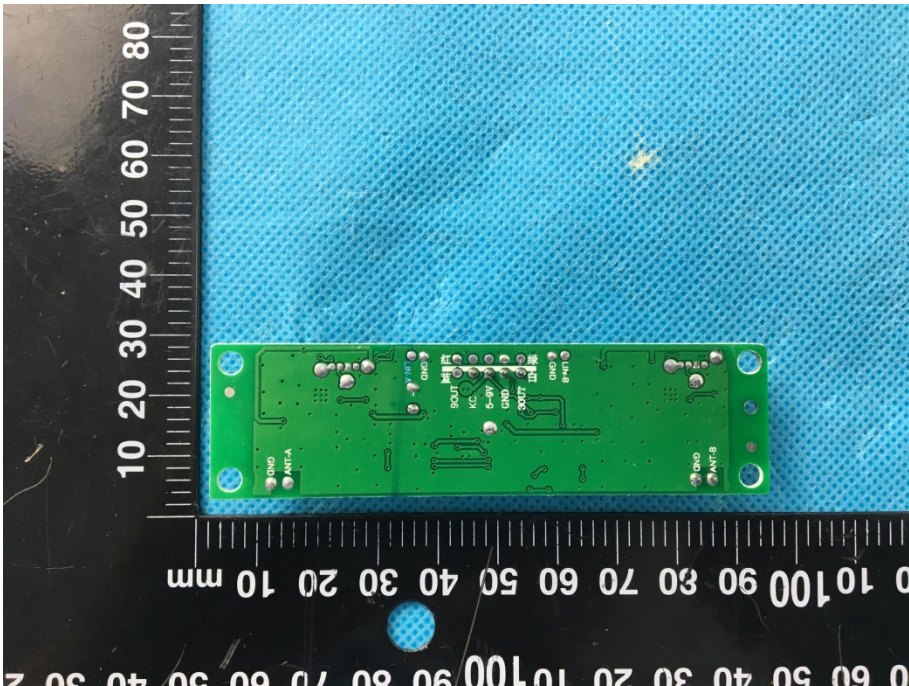

**EUT Housing and Board  
View 2**

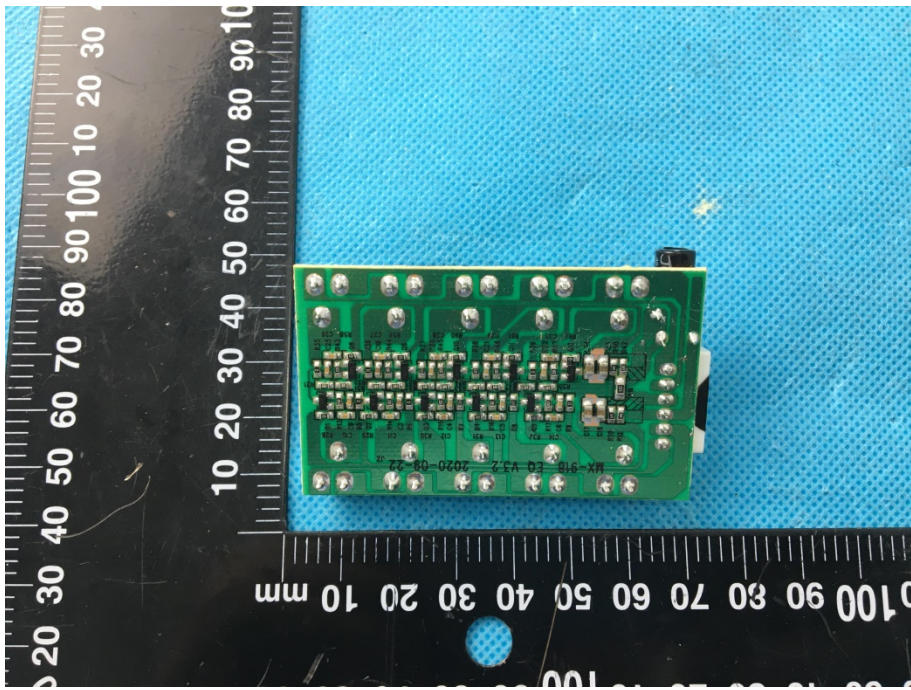

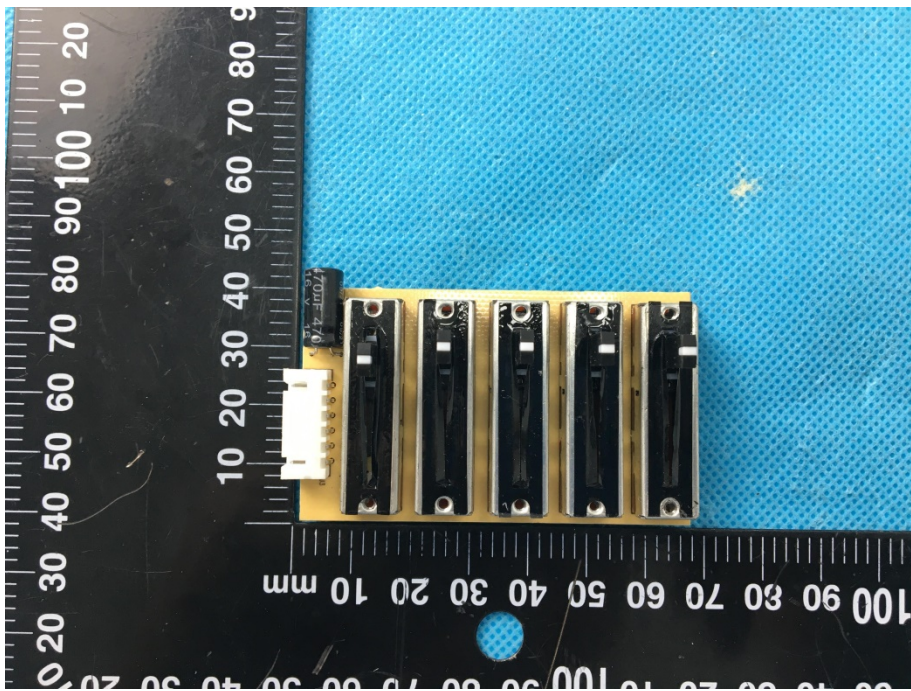

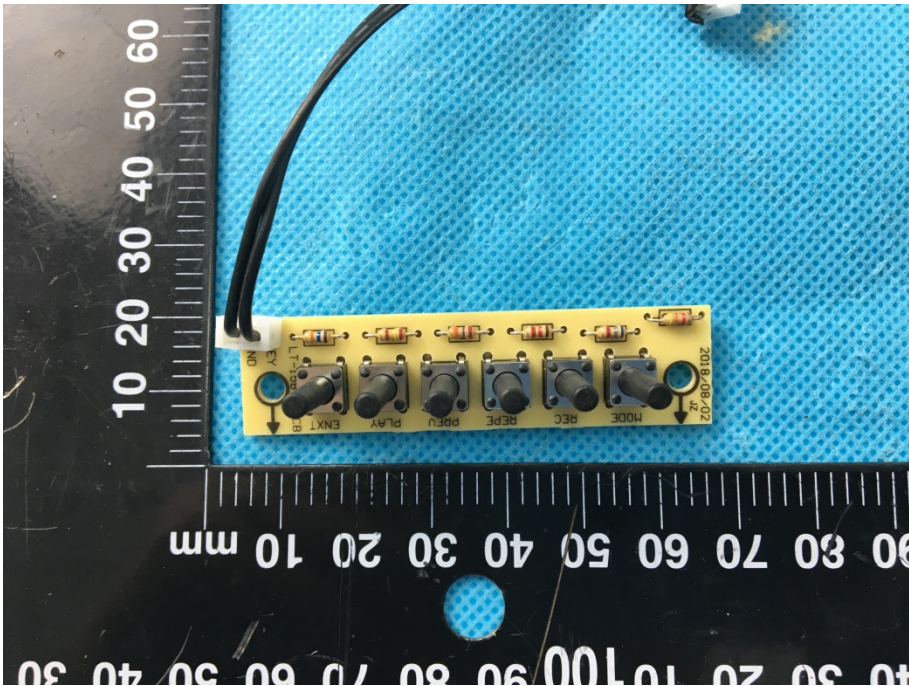

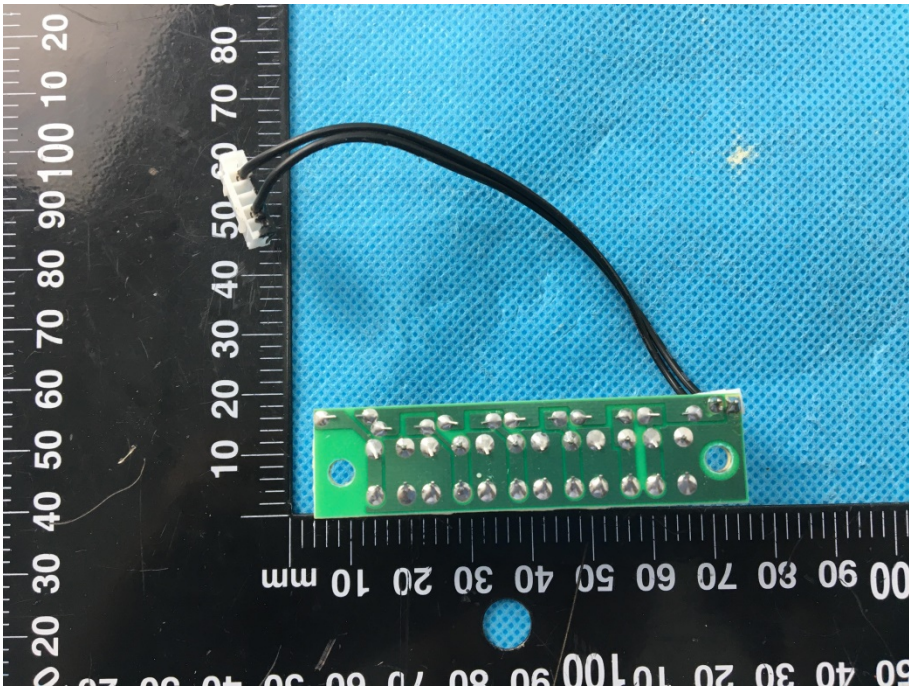

<p style="text-align: center;"><b>Solder Board-Component View 1</b></p>	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 1'. The component is rectangular and populated with several electronic components, including two large electrolytic capacitors, a smaller capacitor, and a central integrated circuit. It is positioned on a blue textured surface. A black ruler with white markings is placed to the left and bottom of the component for scale, showing measurements in millimeters. The ruler markings are oriented vertically and horizontally.
<p style="text-align: center;"><b>Solder Board-Component View 2</b></p>	 A photograph of the same green PCB component, labeled 'Solder Board-Component View 2'. This view shows the component from a different angle, highlighting the solder joints and the underside of the components. The component is placed on the same blue textured surface. A black ruler with white markings is positioned to the left and bottom for scale, with markings in millimeters. The ruler markings are oriented vertically and horizontally.

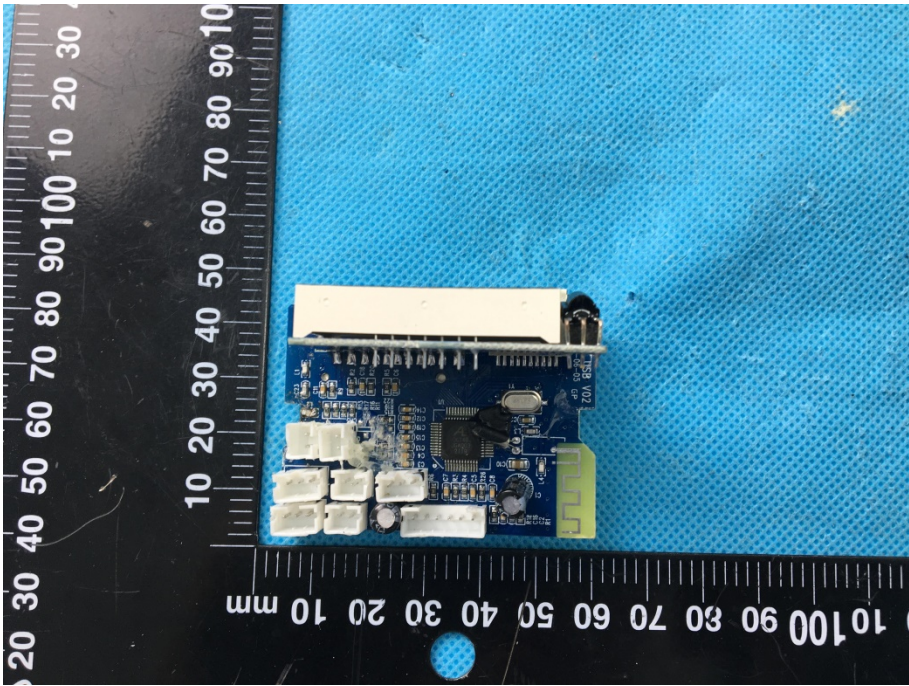

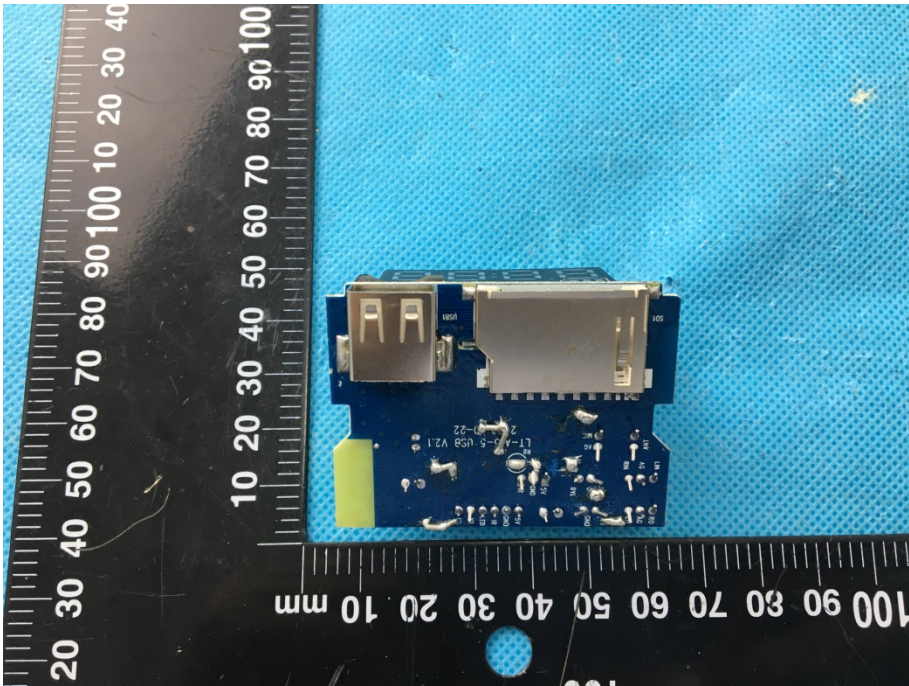

<p style="text-align: center;"><b>Solder Board-Component View 3</b></p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled '3', showing the solder side. The board is populated with various electronic components including a large black electrolytic capacitor, several integrated circuits, and smaller surface-mount components. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component spanning approximately from the 10 mm mark to the 100 mm mark.</p>
<p style="text-align: center;"><b>Solder Board-Component View 4</b></p>	 <p>A photograph of the same green PCB component, labeled '4', showing the reverse side (solder side). The board features various solder joints and components, including a large black electrolytic capacitor and several integrated circuits. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component spanning approximately from the 10 mm mark to the 100 mm mark.</p>

<p style="text-align: center;"><b>Solder Board-Component View 5</b></p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 5'. The board is rectangular and populated with various electronic components, including integrated circuits, resistors, and capacitors. It is positioned on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component spanning approximately 60 mm in length and 30 mm in width. The board has a white connector on the right side.</p>
<p style="text-align: center;"><b>Solder Board-Component View 6</b></p>	 <p>A photograph of a yellow PCB component, labeled 'Solder Board-Component View 6'. The board is rectangular and features several vertical slots or components. It is positioned on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component spanning approximately 60 mm in length and 20 mm in width. The board has a white connector on the left side.</p>

<p style="text-align: center;"><b>Solder Board-Component View 7</b></p>	 A photograph of a yellow PCB component with six potentiometers labeled ENXT, ENXT, ENXT, ENXT, ENXT, and ENXT. A black cable is connected to the left side. The component is placed on a blue textured surface with a black ruler for scale. The ruler shows markings from 10 to 60 mm vertically and 10 to 90 mm horizontally.
<p style="text-align: center;"><b>Solder Board-Component View 8</b></p>	 A photograph of a green PCB component with a row of 12 pins. A black cable is connected to the top. The component is placed on a blue textured surface with a black ruler for scale. The ruler shows markings from 10 to 20 mm vertically and 10 to 100 mm horizontally.

<p style="text-align: center;"><b>Solder Board-Component View 9</b></p>	 <p>A photograph of a blue printed circuit board (PCB) component, labeled 'Solder Board-Component View 9'. The board is positioned on a blue textured surface. A black ruler with white markings is placed vertically to the left of the board, showing measurements in millimeters from 0 to 100. The board features a white rectangular component at the top, several white connectors on the left side, and a green connector on the right side. Various electronic components like resistors and capacitors are visible on the board's surface.</p>
<p style="text-align: center;"><b>Solder Board-Component View 10</b></p>	 <p>A photograph of a blue printed circuit board (PCB) component, labeled 'Solder Board-Component View 10'. The board is positioned on a blue textured surface. A black ruler with white markings is placed vertically to the left of the board, showing measurements in millimeters from 0 to 100. The board features a USB-A port on the left side, a larger rectangular component in the center, and a green connector on the right side. Various electronic components like resistors and capacitors are visible on the board's surface.</p>
