

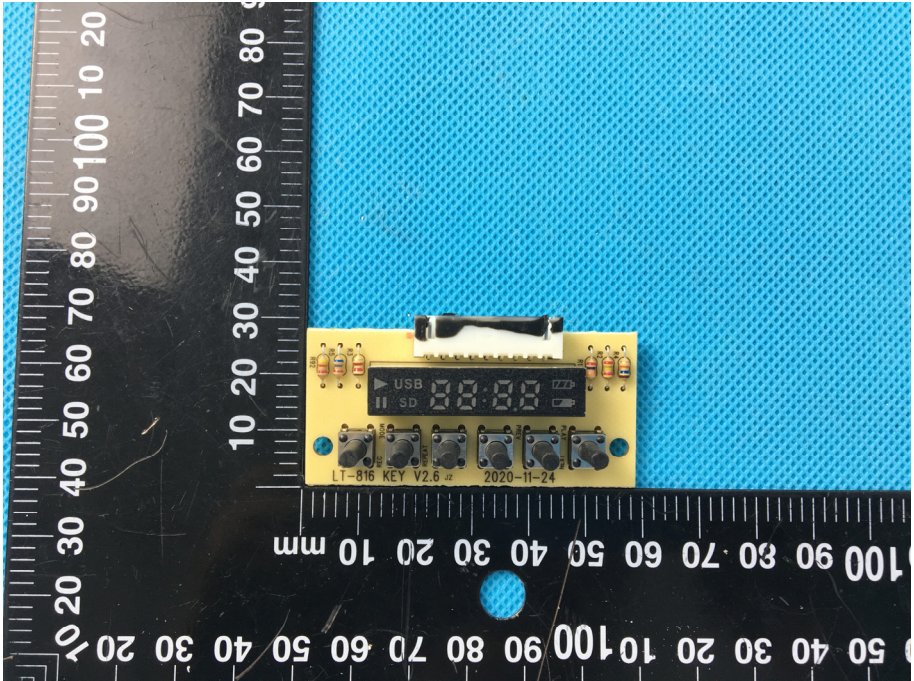

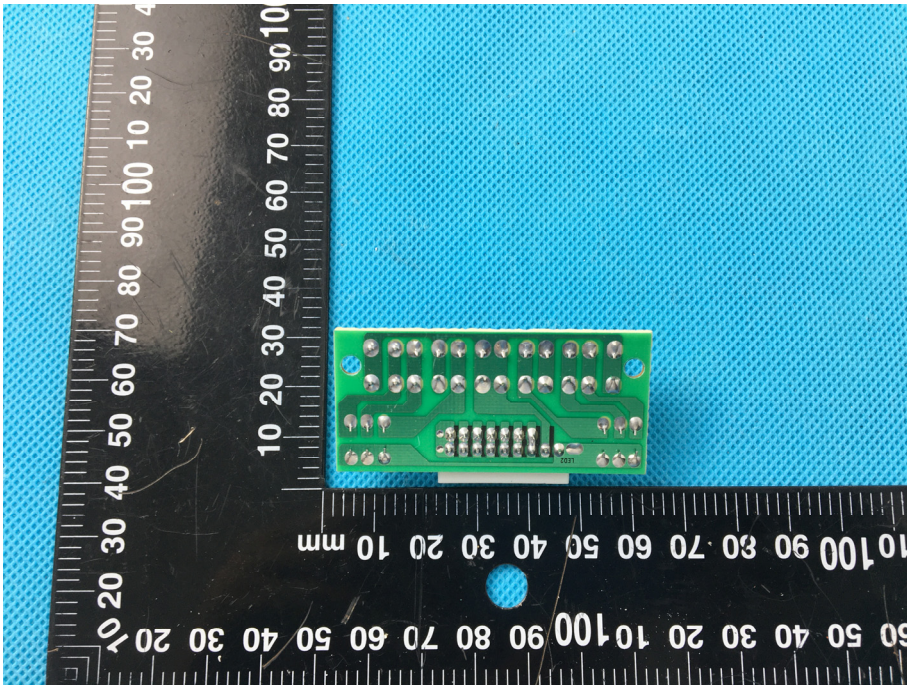

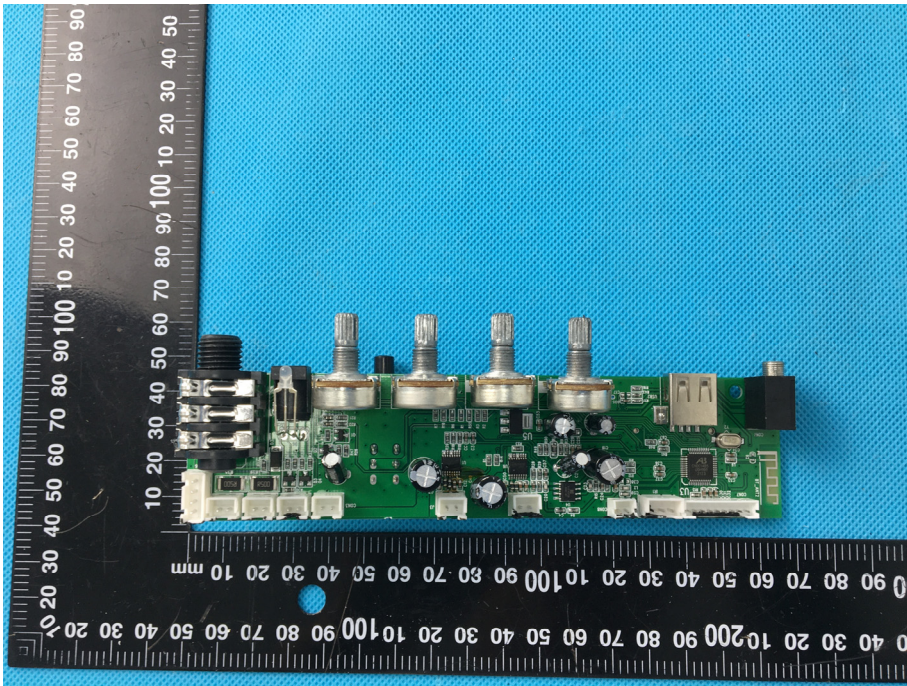

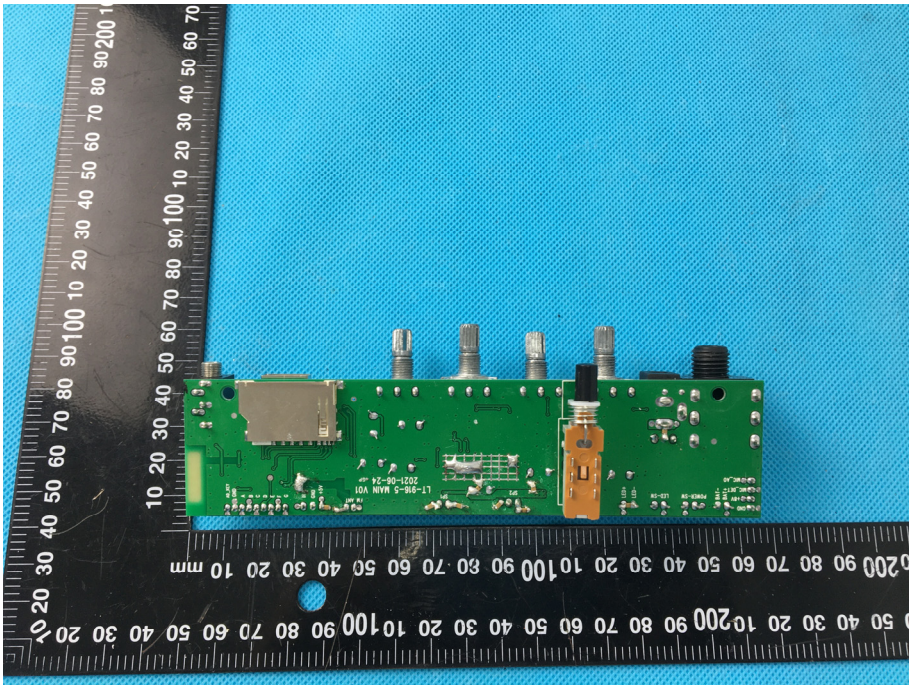

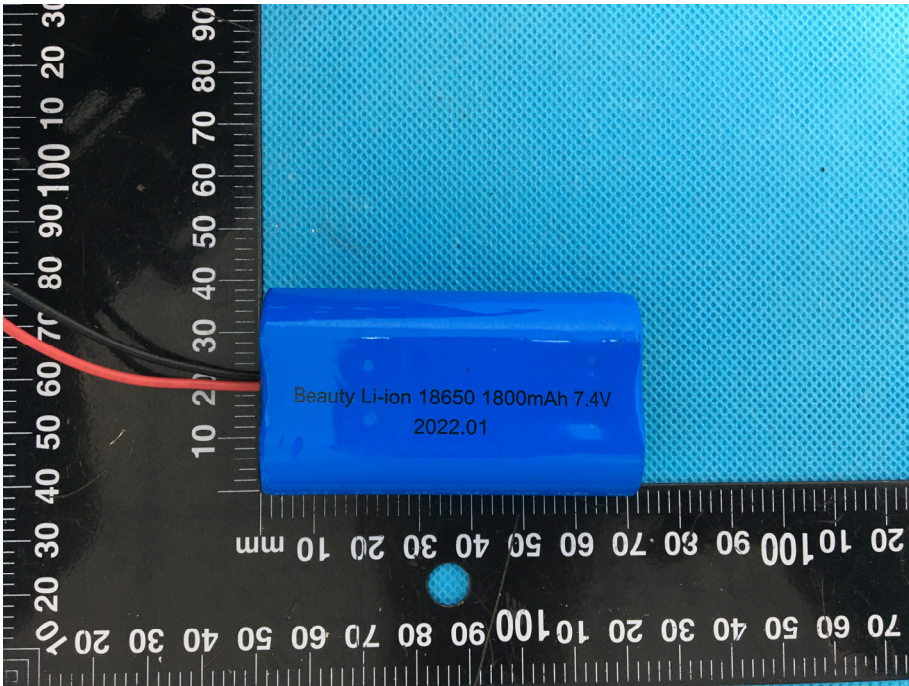

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

|   |  |
|---|--|
| <p><b>EUT Housing and Board<br/>View 1</b></p>      |  A photograph showing the internal components of an EUT (End User Terminal) housed in a black plastic enclosure. The enclosure is open, revealing a green printed circuit board (PCB) with various electronic components, including a microcontroller, capacitors, and connectors. A yellow ruler is placed vertically and horizontally next to the device to provide a scale for its size.                             |
| <p><b>Solder<br/>Board-Component View<br/>1</b></p> |  A close-up photograph of a yellow PCB component, likely a USB-to-serial converter or similar interface board. The board features a USB connector, an SD card slot, and several push buttons. It is soldered onto a larger board. A black ruler with white markings is placed below the component for scale. The ruler shows measurements in millimeters. The component is labeled "LT-816 KEY V2.6" and "2020-11-24". |

|   |   |
|---|---|
| <p style="text-align: center;"><b>Solder<br/>Board-Component View<br/>2</b></p> |  A photograph of a small green printed circuit board (PCB) component. The board is populated with numerous silver solder joints, likely for surface-mount components. It is placed on a blue textured mat next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.  |
| <p style="text-align: center;"><b>Solder<br/>Board-Component View<br/>3</b></p> |  A photograph of a larger green PCB component. This board features several large silver cylindrical components, possibly inductors or capacitors, and various other electronic components like resistors and integrated circuits. It is placed on a blue textured mat next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm. |

|   |  |
|---|--|
| <p style="text-align: center;"><b>Solder<br/>Board-Component View<br/>4</b></p> |  A photograph of a green printed circuit board (PCB) component, likely a module, placed on a blue textured surface. A black ruler is positioned vertically to the left of the component, showing measurements in millimeters. The component features several silver-colored connectors and a central orange component. The PCB has some text printed on it, including "LT-916-5" and "NVR 5-1202". |
| <p style="text-align: center;"><b>Solder<br/>Board-Component View<br/>5</b></p> |  A photograph of a blue cylindrical Li-ion battery component placed on a blue textured surface. A black ruler is positioned vertically to the left of the battery, showing measurements in millimeters. The battery has white text printed on it: "Beauty Li-ion 18650 1800mAh 7.4V" and "2022.01". Two wires, one red and one black, are connected to the battery terminals.                     |
