

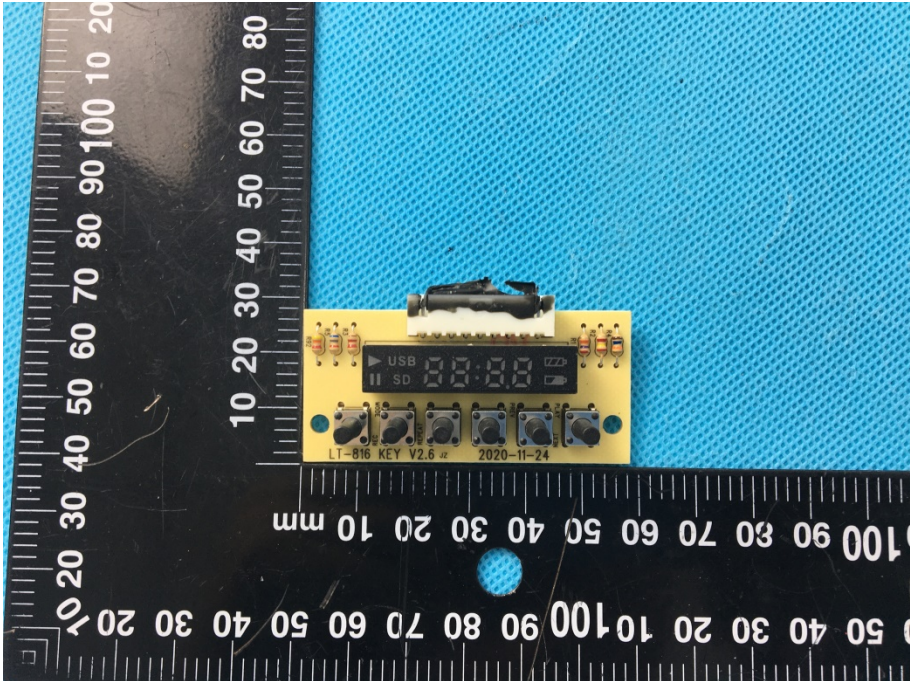

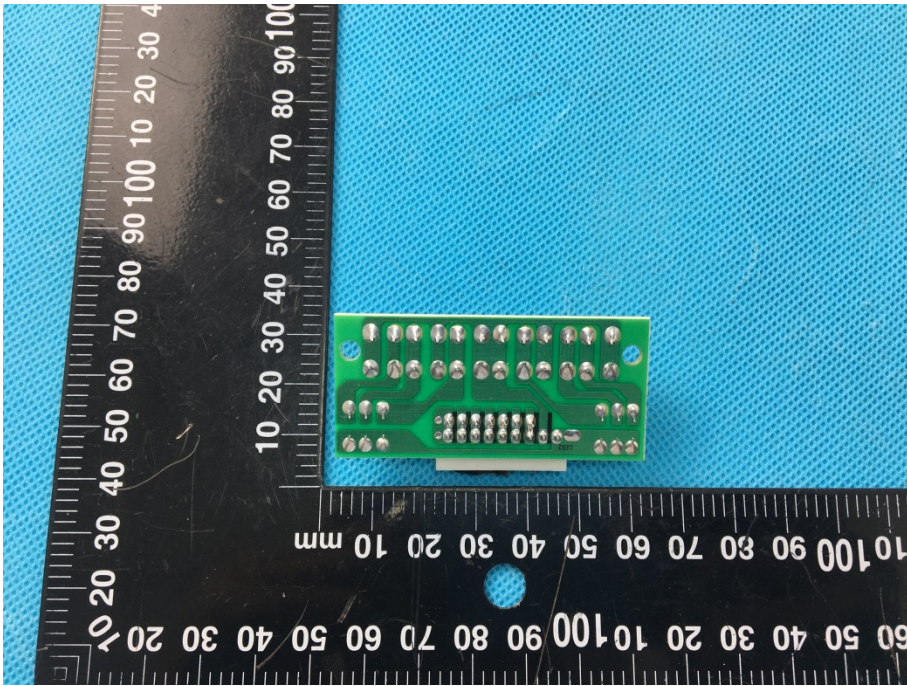

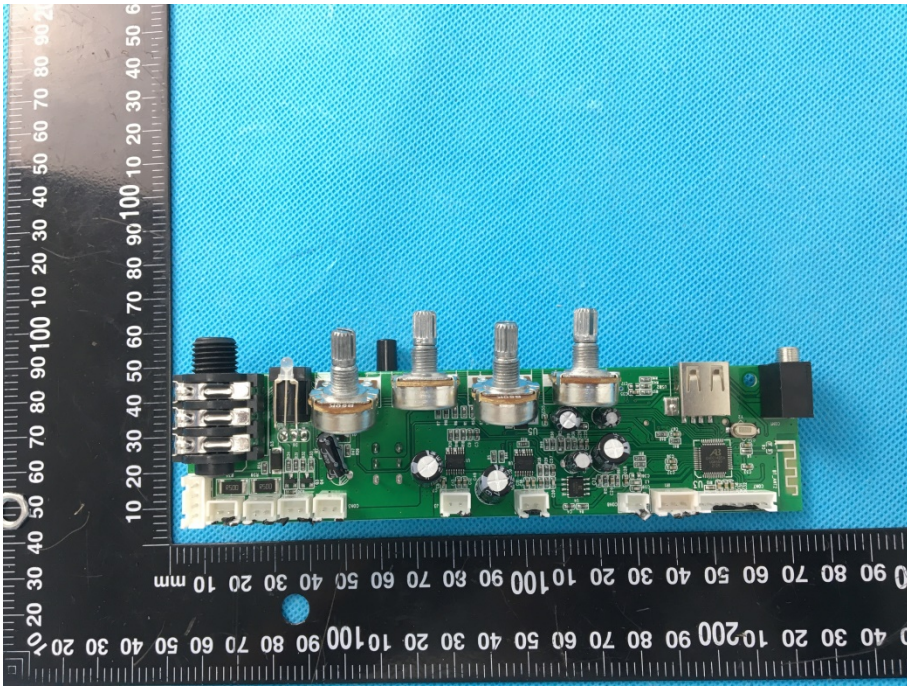

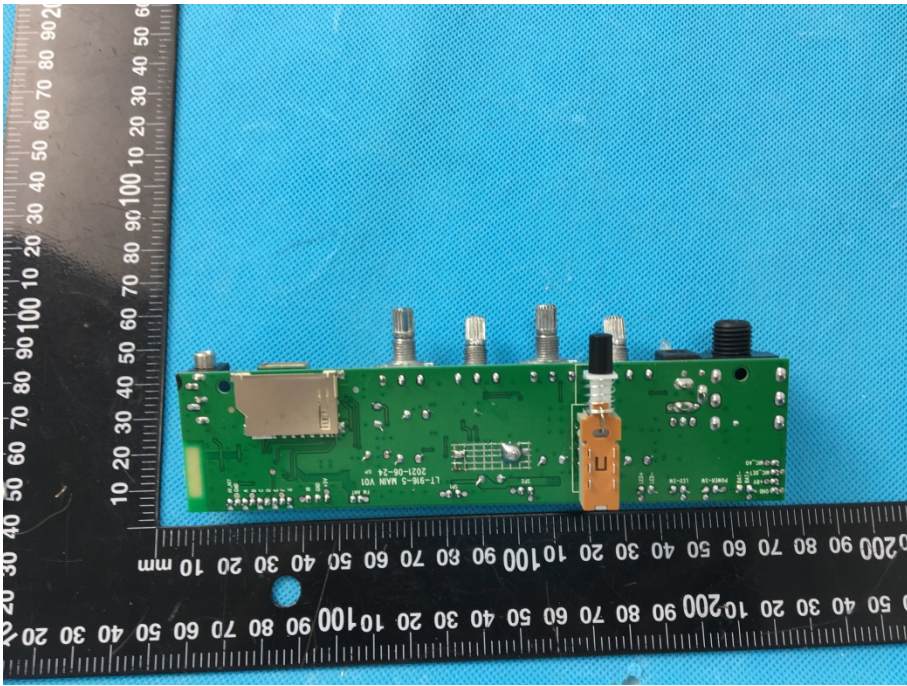

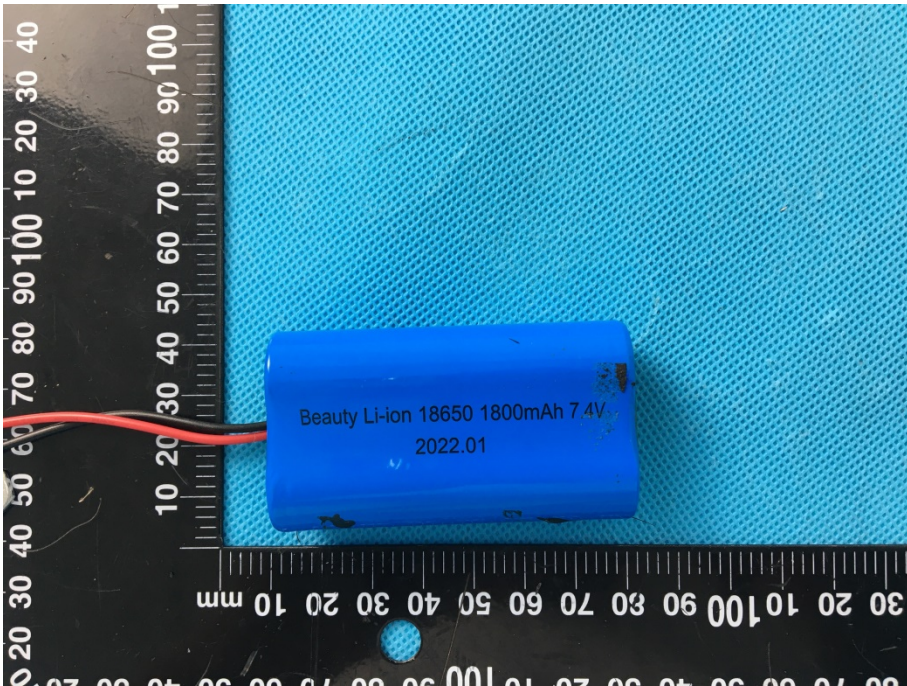

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 A photograph showing the internal components of an EUT (End User Terminal) housed in a black plastic enclosure. The enclosure is open, revealing a green printed circuit board (PCB) populated with various electronic components, including a microcontroller, resistors, and a USB connector. A yellow ruler is placed vertically to the left of the device for scale, indicating its size.
<p>Solder Board-Component View 1</p>	 A close-up photograph of a yellow PCB component, likely a microcontroller or sensor, with a soldered component on top. The component is labeled "LT-816 KEY V2.6" and "2020-11-24". A black ruler with white markings is placed below the component for scale, showing measurements in millimeters.

<p style="text-align: center;">Solder Board-Component View 2</p>	 A photograph of a small green printed circuit board (PCB) component. The board is populated with numerous silver-colored solder joints, likely for surface-mount components. The component is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
<p style="text-align: center;">Solder Board-Component View 3</p>	 A photograph of a larger green PCB component. This board is populated with various electronic components, including several large silver electrolytic capacitors, a black integrated circuit (IC), and various surface-mount components. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.

<p style="text-align: center;">Solder Board-Component View 4</p>	 A photograph of a green printed circuit board (PCB) component, likely a solder board, placed on a blue textured surface. The board is oriented horizontally and features several silver-colored metal pins protruding from its top edge. A black component, possibly a connector or a small module, is mounted on the right side of the board. A black ruler with white markings is positioned vertically to the left of the board, and another ruler is placed horizontally below it, both used for scale. The background is a blue textured mat.
<p style="text-align: center;">Solder Board-Component View 5</p>	 A photograph of a blue cylindrical lithium-ion battery component, labeled "Beauty Li-ion 18650 1800mAh 7.4V 2022.01", placed on a blue textured surface. Two thin wires, one red and one black, are connected to the terminals of the battery. A black ruler with white markings is positioned vertically to the left of the battery, and another ruler is placed horizontally below it, both used for scale. The background is a blue textured mat.
