| ⑫ Signal Extender | x2 |
| ⑬ Cable Tie | x20 |

Estimated installation time:

50 minutes

Required tools:

(to be prepared by oneself)

INSTALLATION TIPS

STEP 1

Pre-assemble the speaker [1] and bracket [2] together with eight screws [4], washers [5] and flat washers [6].

STEP 2

It fits 1.75-2.0 inch diameter crossbeams.

Fit the throat clamp onto the front and rear crossbeams of the vehicle's roof roll cage.

STEP 3

Adjust the position of support bracket [2] according to the distance of the roll bar, tighten the screw on the back of speaker [1] when it is in the appropriate position to secure it. And fix speaker [1] bracket [2] onto the roll bar through the throat pipe [3] as shown in the diagram (**Note: the bracket [2] is adjustable within a length range of 450-755mm/17.7-29.5in.**)

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
