

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

**Conducted Emission
Test Setup**

**Radiation Emission Test
Setup (Below 30MHz)**

<p>Radiation Emission Test Setup (30MHz to 1GHz)</p>	<p>A photograph of a radiation emission test chamber. The walls are covered in white, square-shaped pyramidal absorbers. A bright light source is visible in the upper left. A metal structure with several vertical poles is positioned in the center. A white, rectangular object is placed on a white pedestal on the right side.</p>
<p>Radiation Emission Test Setup (1GHz to 18GHz)</p>	<p>A photograph of a radiation emission test chamber. The walls are covered in white, square-shaped pyramidal absorbers. A red probe is positioned in the foreground, pointing towards a white, rectangular object on a white pedestal. A blue antenna is visible in the foreground. A blue cable is connected to the probe. The floor is covered in blue, conical absorbers.</p>
