**Inquiry Details on 05/25/2022:**

First category: RF Exposure \*  
Second category: Portable ( 2.1093)  
Third category:  
Subject: Seeking guidance for portable wireless chargers  
Inquiry: Dear officer,  
Nice day.  
We have a wireless charger which is subjected to part 15. The device meets all the requirements in section 5(b) of KDB680106 D01 except that the device has portable exposure condition.  
1. In the "Subject"line, fill the field as follows: Seeking guidance for portable wireless chargers;  
2. Complete product description:  
The device is a wireless charger operating at 110-205kHz.  
3. Planned equipment authorization procedure:  
The device will be subject to certification procedure.  
4. Illustrations  
Please refer to the technical description.  
5. Radiated power:  
The peak field strength at 3m is 88.12 dBuV/m  
6. Operating configuration  
Mobile is placed directly in contact with the charger  
7. Conditions of human exposure  
The aggregate leakage fields at 15 cm surrounding the device and 20cm above the top surface of the device are less than 50% of the MPE limit. Please refer to the RF exposure report  
8. Internal and external photos  
Please refer to Internal photos.pdf and external photos.pdf  
9. Used condition  
Wall charger or power bank. Both of them had been tested and only the worst case testing data were recorded in the report.  
10. Rating of the device.  
USB-C inputt:5.0V\_2.4A,9.0V\_2A  
Wireless Output:15W Max,

- Could you please help me reply as soon as possible

---Reply from Customer on 05/31/2022---

Dear officer,  
Nice day.

We have a wireless charger which is subjected to part 15. The device meets all the requirements in section 5(b) of KDB680106 D01 except that the device has portable exposure condition.

1. In the "Subject"line, fill the field as follows: Seeking guidance for portable wireless chargers;

2. Complete product description:

The device is a wireless charger operating at 110-205kHz.

3. Planned equipment authorization procedure:

The device will be subject to certification procedure.

4. Illustrations

Please refer to the technical description.

5. Radiated power:

The peak field strength at 3m is 88.12 dBuV/m

6. Operating configuration

Mobile is placed directly in contact with the charger

7. Conditions of human exposure

The aggregate leakage fields at 15 cm surrounding the device and 20cm above the top surface of the device are less than 50% of the MPE limit. Please refer to the RF exposure report

8. Internal and external photos

Please refer to Internal photos.pdf and external photos.pdf

9. Used condition

Wall charger or power bank. Both of them had been tested and only the worst case testing data were recorded in the report.

10. Rating of the device.

USB-C input:5.0V\_2.4A,9.0V\_2A

Wireless Output:15W Max,

FCC Response on 06/01/2022:

The submitted RF exposure report is satisfactory. Because the device is portable, it does not meet all six conditions of Clause 5B in KDB 680106 and will still be subject to a PAG filing from the TCB.
