

MANUAL I.

1. Work as magnetic suction wireless power bank supporting iPhone 12/13 Series

2. Work as normal wireless power bank, supporting all mobilephones with Qi protocol
Supporting GPHW, XMSAM and other wireless charging phones

3. Work as portable small size power bank, supporting normal charging for 99% phones

4. Work as wireless charger put on desk for convenient charging

5. The device can be held in the hand for normal use.

Notes: wireless charging function

- Put the phone on the wireless charger, click to turn on the wireless charging function
- When using the charger to charge the power bank, when the input is in the fast charging state, then turn on the wireless charging for fast charging. If you turn on the wireless charging first, then use the charger to charge the power bank, there will only be 5W wireless charging
- In the charging process of the power bank, when it is fully charged, the charging protocol will switch to the 5V input state. At this time, wireless charging is turned on, and only ordinary 5W charging is available. When the input charging cable is unplugged, it will automatically restart, and the wireless charging can enter the fast charging mode
- During charging with PD12V charger, the wireless charging function is turned off because wireless charging does not support 12V power supply

DIGITAL ORIGINAL DESIGN

Features

- 15W magnetic wireless quick charging
- Power bank + wireless + magnetic suction 3 in 1
- PD+QC2.0W quick charging
- Sync input and output for portable charging
- Accurate LED power indicators
- High quality safe polymer battery

Packing details

- Power bank * 1
- manual * 1
- Type-C charging cable * 1

Power Indicators

Power indicators to monitor the power status

1. Checking remaining power

Click the button, if one white light is on, it means the power is within 20%, if two white lights are on, it means the power is within 40%, if three white lights are on, it means the power is within 60%, if four white lights are on, it means the power is within 80%, and if four white lights are on, it means the power is within 100%. When the last light of the light flashes, the battery level is less than 5%, please charge it as soon as possible

2. Checking charging function:

After clicking the button, during use, the first light turns on White, indicating that the mobile power bank has started the fast charging function, if the fifth Light turns on green, it means that the mobile power wireless charging function works normally.

 - if not, please choose compatible components to charge it
- When it's charging for the phone
 - Please make sure the power is on and there is power left in this device
 - If above are checked OK, please go to the local retailer for assistance

Specifications

Name	Magnetic Wireless Power Bank
Battery	Polymer
Type-C input	DC5V=3A/9V=2.25A/12V=1.5A
Type-C output	DC5V=3A/9V=2.25A/12V=1.5A
Wireless output	15WMax
Executive standard	GB/T35590-2017
Working temperature	-10°C-40°C

Made in China

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
