01

Screw the bolts (A) into the four poles (C) through the bottom board (B). Then place the four cushions (I) on top of the screw holes for added stability.

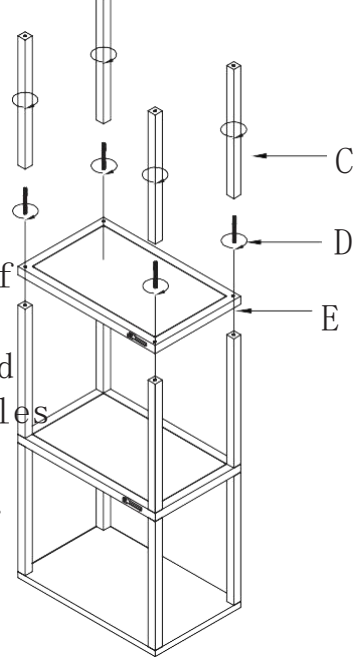

02

Attach one level of the LED module with glass shelving (E) into the poles from Step 1 using four two-sided bolts (D), and then add another level of poles (C) onto the other side of the bolts.

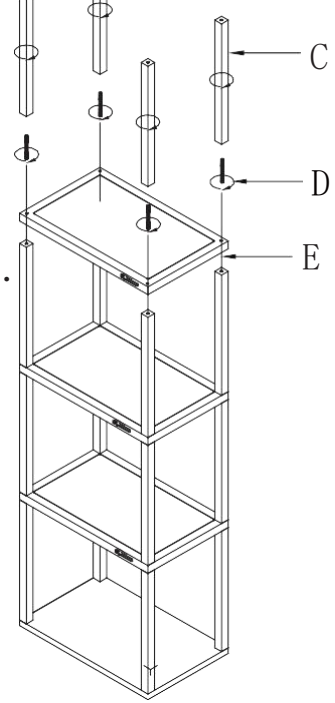

03

Add another layer of the LED module and glass shelf (E) and another layer of poles (C) by using the two-sided bolts (D).

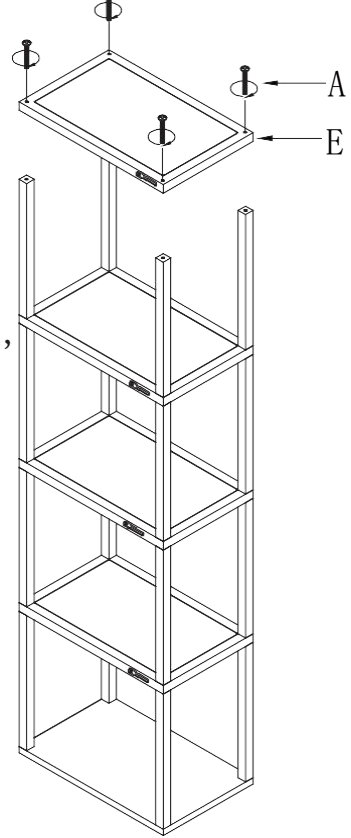

04

Repeat step 3.

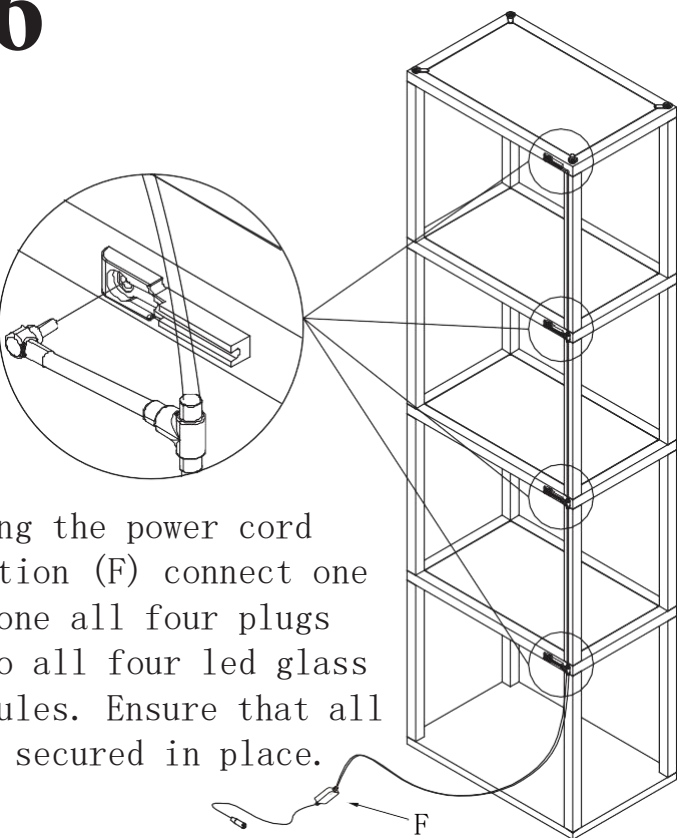

05

When adding the final LED module and glass shelf (E), screw in four regular bolts this time (A).

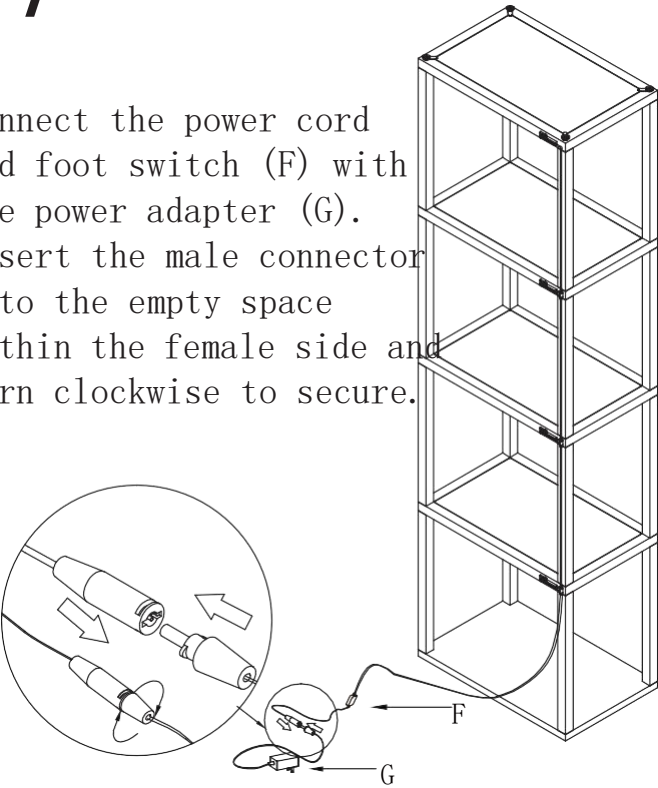

06

Using the power cord section (F) connect one by one all four plugs into all four led glass modules. Ensure that all are secured in place.

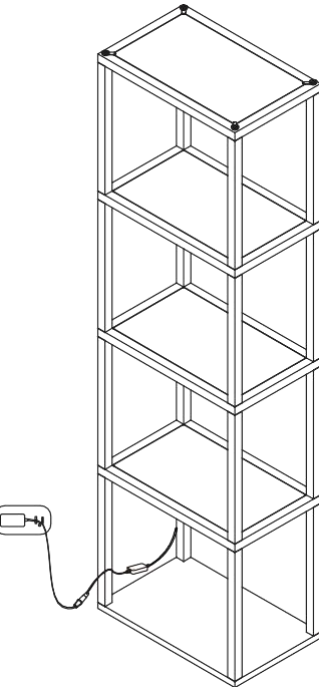

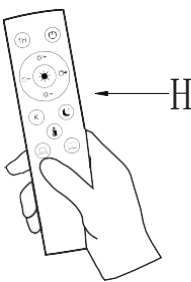

07

Connect the power cord and foot switch (F) with the power adapter (G). Insert the male connector into the empty space within the female side and turn clockwise to secure.

08

Our display shelves are now enhanced with Correlated Color Temperature (CCT) technology. You can now effortlessly transition between warm and cool toned lighting (2700K to 6000K). With our user-friendly app and remote control, you now have the power to tailor the lighting tone of your product.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

Floor Lamp

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

Remoter Control

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment can be used as portable exposure without any restriction.
