

# DC Fan Lamp Remote Controller User Manual

## Function Introduction

- ① Switch Indicator
- ② Speed Controller
- ③ Fan Shutdown
- ④ Fan Reverse  
Press this Key when the fan works
- ⑤ Natural Wind  
Speed 1 to speed 6 cycle switching
- ⑥ Lamp Switch
- ⑦ Timer  
Once pressing the timer key, please do not press any other keys. Or the order will be cancelled.

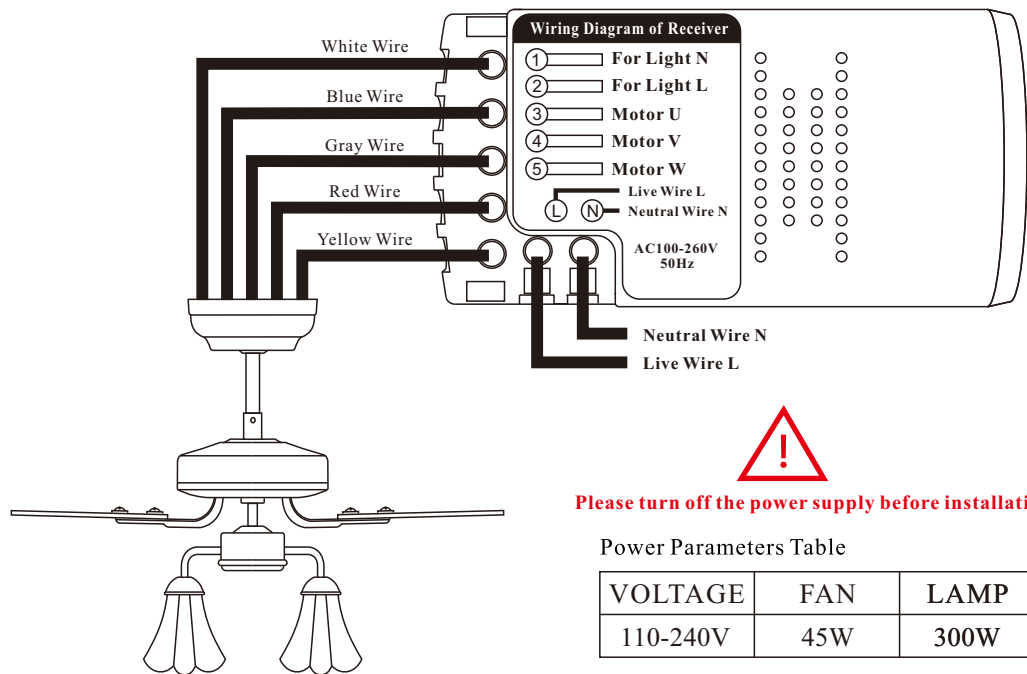

## Matching Method

You will hear a “beep” sounds when the receiver powered on. And then, please press the “Light ON/OFF” key immediately till you hear a long “beep” sounds. It means success.

**Tips:**  
**The remote control has been paired before leaving the factory and it can be used directly after installation. Re-pairing is required when you need to add or replace a new remote.**

1. When the emitter is unable to remotely control the receiver, please check whether the switch batteries are in good contact, whether they are fixed properly and whether they run out of use.
2. When the emitter is unable to remotely control the receiver, please check whether there is other remote control products around the space and check whether the keys are pressed down, because same nature of remote control product may cause interference with each other resulting in poor receiving effect. Taking away such articles will normalize the remote control function. (the infrared remote controller is not included).
3. Please use this product under applicable voltage. Too low voltage will lead to failure of the remote controller to work (Please refer to the product label for the voltage range and related parameters).
4. Please take out the batteries if you will not use this product for a long time.

## Notices

Please turn off the power supply before installation

Power Parameters Table

VOLTAGE	FAN	LAMP
110-240V	45W	300W

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that

interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

The device has been evaluated to meet general RF exposure requirement, the device can be used in portable exposure condition without restriction
