

Huizhou Tongyinhai Precision Electronics Co., Ltd.

2022/06/10

To: Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD

FCC ID: 2A4B3-A14

To Whom It May Concern:

This letter is to ascertain that, Product: Magnetic Wireless Power Bank_A14
M/N: A14 and it meets 680106 D01 RF Exposure Wireless Charging App v03
Clause 5(b) all 6 conditions.

1	Power transfer frequency is less than 1 MHz
Reply:	Yes, Power transfer frequency is less than 1 MHz ; Ans : The operating frequency of EUT is 110KHz -148KHz
2	Output power from each primary coil is less than or equal to 15 watts.
Reply:	Yes, Output power from each primary coil is 15 watts.The max output power is 15W.
3	The transfer system includes only single primary and secondary coils. This includes charging systems that may have multiple primary coils and clients that are able to detect and allow coupling only between individual pairs of coils.
Reply:	Yes, EUT has one primary coils, but each coil can only correspond to one client
4	Client device is placed directly in contact with the transmitter.
Reply:	Yes, The client device needs to be in contact with the transmitter base, and the contact distance is less than 10mm.
5	Mobile exposure conditions only (portable exposure conditions are not covered by this exclusion).
Reply:	No, it is a portable wireless charger, need to go PAG.
6	The aggregate H-field strengths at 15 cm surrounding the device and 20 cm above the top surface from all simultaneous transmitting coils are demonstrated to be less than 50% of the MPE limit.
Reply:	Yes, RF Exposure Evaluation report test result meets this Limit.Please refer to the RF exposure Evaluation report.

If you have any question or concerns, pls. contact us.

Sincerely,

Jinjin Wang
