RE: Class II Permissive Change

Date: October 7, 2022

To Whom it May Concern:

This letter grants authorization for representatives of 3Shape TRIOS A/S, to apply for a Class II Permissive Change as specified under 47 CFR FCC Part 2.1043 of the Code of Federal Regulations.

This authorization applies to 3Shape TRIOS A/S, FCC ID: 2A4DE-3S001, approved on 02/01/2022, which has further modification of:

The Class 2 Permissive Change covers a change of antenna (to Taoglass FXP840) that is not part of the ST60-SIPT existing FCC approval. For that reason representatives of 3Shape will perform a C2PC under 3Shape's own FCC ID to add this antenna option. This application is adding a portable configuration authorization for the specific host documented in the filing, in addition to the new antenna.

This specific host has also limited the WiFi functionality to NII band 1 and 3 (also removing channel 165) as configured at the factory. The 2.4 GHz WiFi and NII band 2A and 2C WiFi are disabled at the factory. The disabling is permanent and locked in the device firmware. Users can not access or modify the device firmware.

This change should not affect the original FCC grant.

Sincerely,

Mike Simpson
