

Quick Start Guide

Included In-Box:

- Device
- Power Adapter

Set Up Your Device:

Step 1: Download the Alexa App from your App store.

Login with an existing Amazon account username and password, or create a new account.

Note: be sure to turn on your phone's Bluetooth and have your wifi password ready.

Step 2: Plug in Your Device

Use the included power adapter. A blue light bar will flash on the device. In about a minute, Alexa will tell you to complete setup in the app.

Step 3: Follow Setup in the App

If you aren't prompted to set up your device after opening the Alexa app, tap the More icon to add your device manually. The app helps you to get more out of your device. It's where you set up calling and messaging and manage music, lists, settings and news.
