Columbia MD 21046

**SUBJECT:** Class II Permissive Change for FCC ID: 2A4DX-2195873-1

The intention of this application is to enable the modular FCC ID: 2A4DX-2195873-1, granted on 08/16/2022 to be integrated in LEMBAS USB Modem, 2195873-1. The WCDMA and LTE Band 5/13/14/66/71 operation will be disabled by embedded software when integrating in the host device.

The module installed into host platform mentioned above is electronically and mechanically identical to the original certified module. The Original FCC testing on module under FCC ID: 2A4DX-2195873-1 was performed with an antenna of higher gain, and the antenna was connected to the module in an open environment. The current host platform under application uses an antenna with lower gain and is installed inside the host platform enclosure. The physical restraints introduced by the host platform should have resulted in equal or lower level of radiated emission. Therefore, additional Radiated emission testing is not necessary.

Sincerely yours,

Jin Soo Kim
