

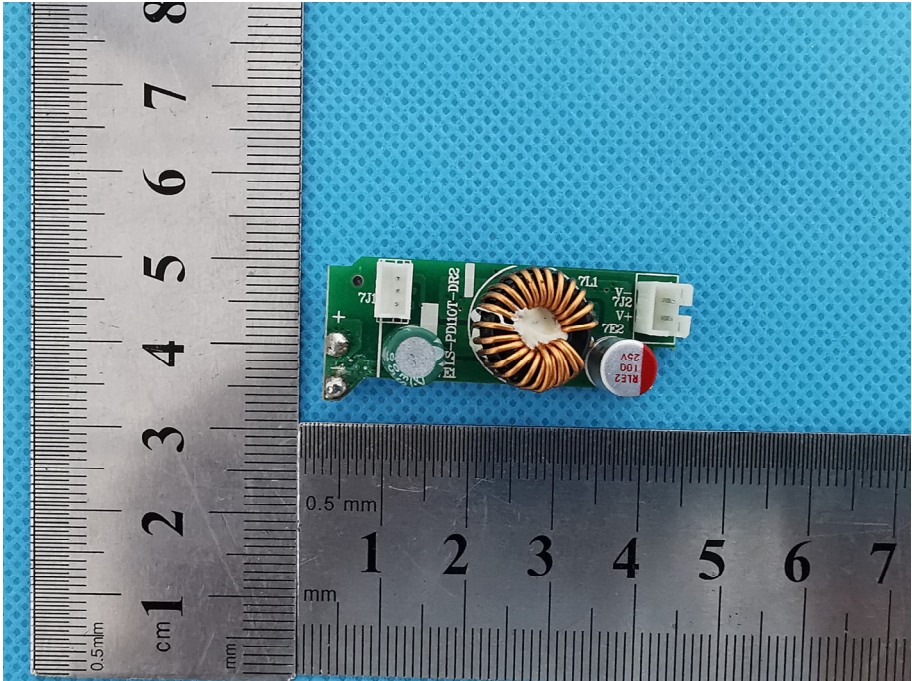

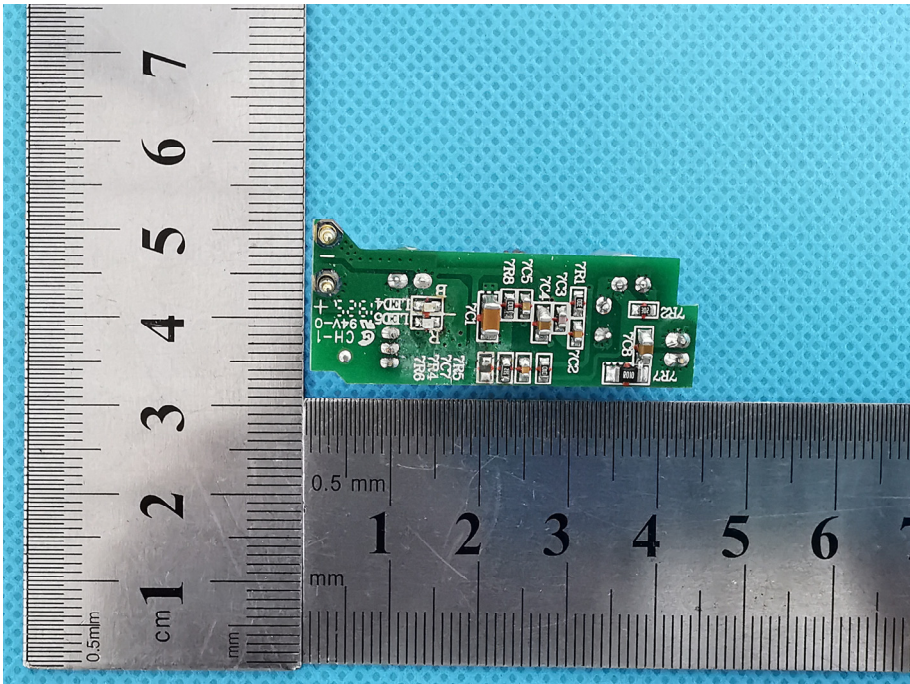

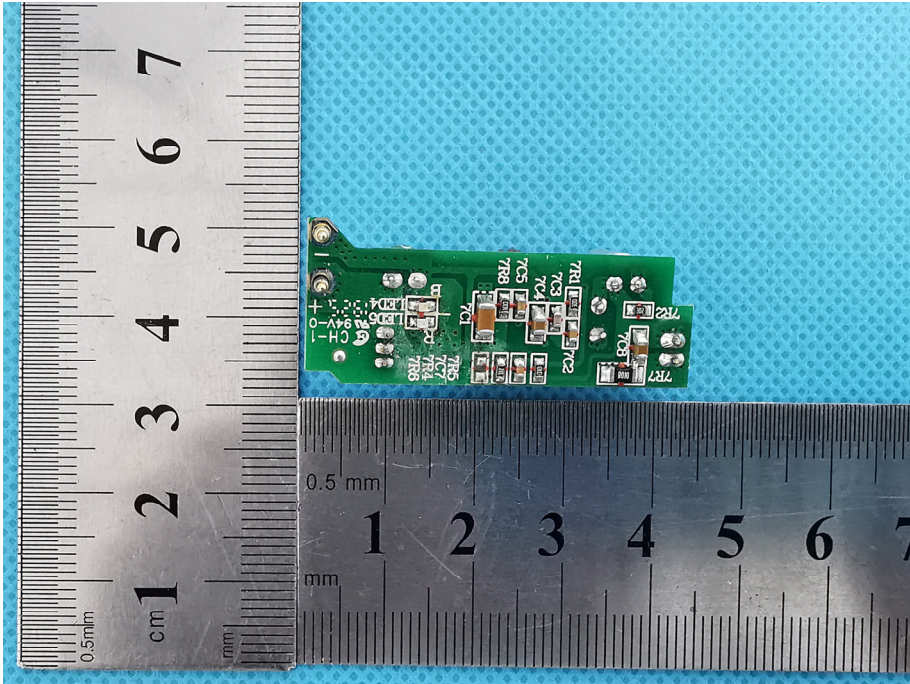

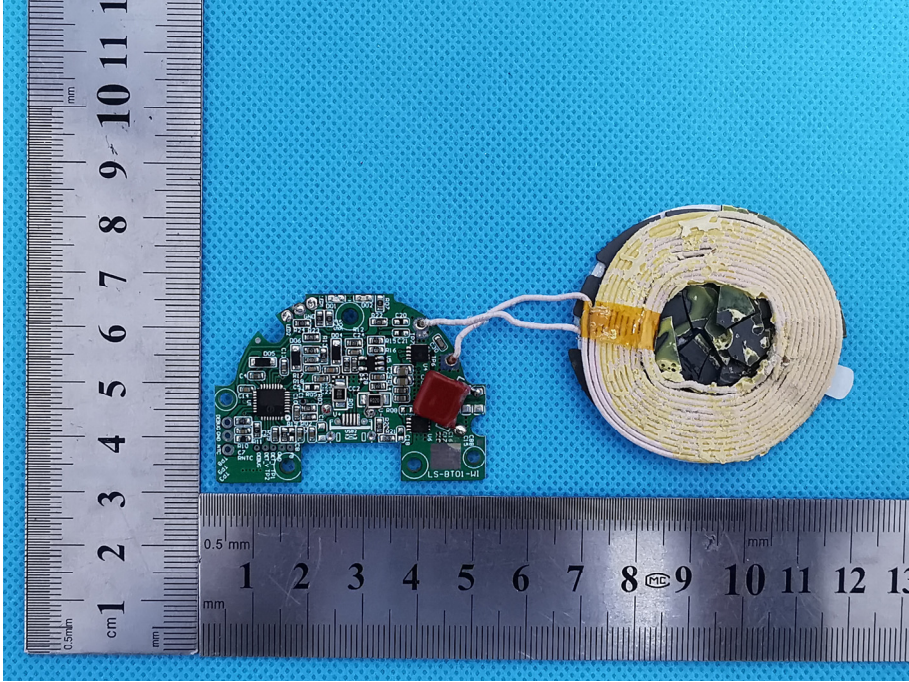

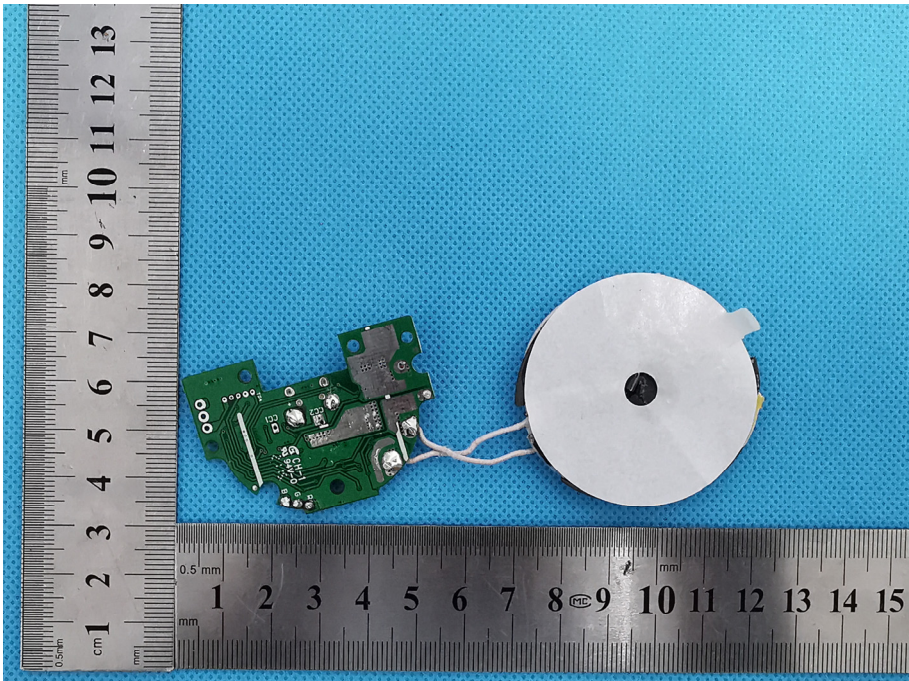

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 <p>This photograph shows the internal components of the EUT housing. On the left is the black plastic housing with a green PCB, a white battery, and various electronic components. On the right is the black plastic back cover. A ruler is placed below the components for scale, showing measurements in centimeters and millimeters.</p>
<p>Solder Board-Component View 1</p>	 <p>This is a close-up photograph of a green PCB component. It features a large toroidal inductor, a red electrolytic capacitor, and other electronic components. A ruler is placed below the component for scale, showing measurements in millimeters.</p>

<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 2'. The component is rectangular and populated with various electronic components, including integrated circuits (ICs) and surface-mount components. The board is placed on a blue textured background. A metal ruler is positioned vertically to the left of the component, showing centimeter and millimeter markings. A second metal ruler is positioned horizontally below the component, showing millimeter markings. The component is oriented vertically, with its top edge towards the right. The ruler markings indicate the component's size is approximately 4.5 cm in height and 2.5 cm in width.</p>
<p style="text-align: center;">Solder Board-Component View 3</p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 3'. This view is identical to the one above. The component is rectangular and populated with various electronic components, including integrated circuits (ICs) and surface-mount components. The board is placed on a blue textured background. A metal ruler is positioned vertically to the left of the component, showing centimeter and millimeter markings. A second metal ruler is positioned horizontally below the component, showing millimeter markings. The component is oriented vertically, with its top edge towards the right. The ruler markings indicate the component's size is approximately 4.5 cm in height and 2.5 cm in width.</p>

<p style="text-align: center;">Solder Board-Component View 4</p>	 <p>A photograph showing a green printed circuit board (PCB) component and a circular component with a white tape and a central hole. The PCB has various components, including a red component and a component labeled 'LS-BT01-HI'. Two white wires connect the PCB to the circular component. The assembly is placed on a blue textured surface next to a ruler for scale. The ruler shows centimeters and millimeters.</p>
<p style="text-align: center;">Solder Board-Component View 5</p>	 <p>A photograph showing the same PCB component and circular component as in View 4, but from a different angle. The circular component is now covered with a white tape, and the central hole is visible. The assembly is placed on a blue textured surface next to a ruler for scale. The ruler shows centimeters and millimeters.</p>
