Star light:
resolution

Use custom LED lamp, the principle of small hole imaging, is projected from the center to the periphery. It is a Platonic dodecahedron design, not a single facet. The closer the projection is, the sharper it is, the farther it is, the more blurred it is.

Use space
Suitable for about 12 square meters of space
Need to be used in an all black environment
Unable to see the effect during the day

Use Height:
Suitable for heights up to 2.8m
If there is light around you can't see the effect
Can't see the effect if the distance is too large or too high

*The product is suitable for ordinary household use and is not suitable for living rooms, halls, foyers, KTV, classrooms, etc.

Disassemble the Lampshade base

Thumbs down on the sides of the led light in the middle
Four fingers on both sides lift up the bottom

Insert the base position
Power button
Long press for 3 seconds

Remote control receive hole
STARRY SKY
USB charge / power supply
Power indicator

Step 1: Turn on the light, use the remote control when the lights on
 Step 2: If there is a battery partition at the bottom of the remote control, unplug it first!
 Step 3: Align the remote control with the receiving hole on the back of the product, then you can control the light.

Note: Remote control indicator light uses infrared, therefore, the remote control indicator light is not visible.

Bluetooth pair: Please search for the device "playshion" for Bluetooth pairing. After pairing, you can play music of your phone on the starry night light

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
