## **► How to wear the Receiver to your pet**

- 1.Put the Receiver on dog's neck
- 2.The contact point reach to the skin of dog, you need to choose the suitable rubber cap.
- 3.Adjust the belt collar, make your dog comfortable.

### **Tips:**

1.Before training, let your dog wear the electric collar for about 5-7 days (no more than 8 hours per day) so that he can be accustomed to the weight of the collar and believe it is just another normal collar.

2. Timing is crucial

The more precise the timing is the quicker your dog will make the association and change his or her behavior.

3. Praise your dog

It will be helpful to praise your dog as soon as it responds to the collar. Reward it with a pat, by saying "good dog", or with a special treat.

**FCC Requirement:**

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
