

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an Electronic Under Test (EUT) housing. The green printed circuit board (PCB) is visible, populated with various electronic components including a microcontroller, capacitors, and a small antenna. The PCB is mounted within a black plastic housing. A black ruler with white markings is placed horizontally below the housing for scale, showing measurements in millimeters. The background is a blue textured surface.
Solder Board-Component View 1	 A close-up photograph of the soldered components on the green PCB. The image shows the intricate solder joints connecting various components, including a microcontroller and a small antenna. A black ruler with white markings is placed horizontally below the PCB for scale, showing measurements in millimeters. The background is a blue textured surface.

Solder Board-Component View 2	 A photograph of a small electronic component, likely a module, mounted on a green printed circuit board (PCB). The component features a white cylindrical component, possibly a battery or a capacitor, and several surface-mounted components. It is positioned on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component spanning approximately 10 to 20 mm.
Solder Board-Component View 3	 A photograph of a small electronic component, likely a module, mounted on a green printed circuit board (PCB). The component features a black cylindrical component, possibly a battery or a capacitor, and several surface-mounted components. It is positioned on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component spanning approximately 10 to 20 mm.
