| <p><b>EUT Housing and Board<br/>View 1</b></p>      |  A photograph showing the internal components of a mobile device. On a blue textured surface, there is a black plastic back cover with a battery compartment, a silver metal frame, a green printed circuit board (PCB) with various electronic components, a black LCD screen, and a small black component with a red wire. A black ruler with white markings is placed horizontally and vertically for scale. |
| <p><b>Solder<br/>Board-Component View<br/>1</b></p> |  A close-up photograph of a green printed circuit board (PCB) component. The board is populated with various electronic components, including a large black integrated circuit, capacitors, and connectors. A black ruler with white markings is placed horizontally and vertically for scale.                                                                                                                 |

|                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| <p><b>Solder</b><br/><b>Board-Component View</b><br/><b>2</b></p> |  A photograph of a green printed circuit board (PCB) component, likely a camera module, resting on a blue textured surface. The component is rectangular with a long, thin extension on the right side. It is surrounded by a black ruler with white markings in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom. The component is positioned between the 10 mm and 80 mm marks on the vertical ruler and between the 20 mm and 100 mm marks on the horizontal ruler.                                                                   |
| <p><b>Solder</b><br/><b>Board-Component View</b><br/><b>3</b></p> |  A photograph of a white rectangular battery component resting on a blue textured surface. The battery has two wires (red and black) extending from its top edge. It is surrounded by a black ruler with white markings in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom. The battery is positioned between the 10 mm and 80 mm marks on the vertical ruler and between the 20 mm and 100 mm marks on the horizontal ruler. The battery label includes the text: "JHCV 343640H 3.7V", "500mAh 1.85Wh 21/11", and a recycling symbol. |
