

HISMITH® PRO TRAVELER

About Hismith Brand
Innovation and technology are steadily making our lives easier and more enjoyable. According to Forbes, machines have already taken over 90% of the jobs humans used to do, and even do it better. So, why not blow jobs?

We noticed that ever since the invention of the first vibrator in 1880, they have become more compact, waterproof and better looking, but they're still just vibrators and you still need do the job yourself...

We were still only a bunch of horny engineering students back then, but we just knew there must be a better way.

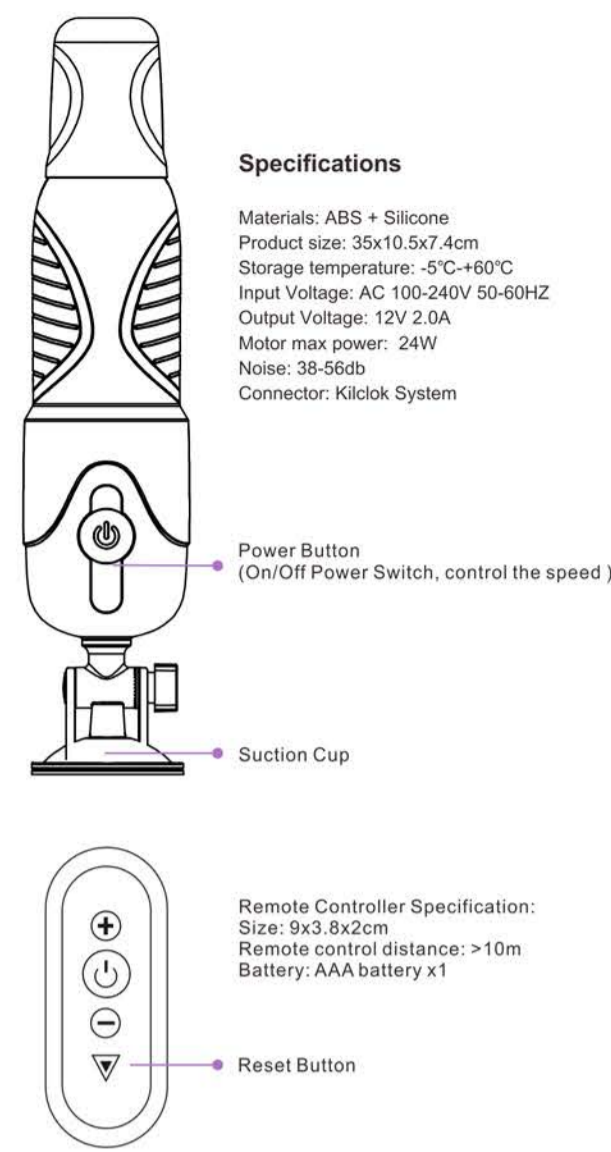

Every idea starts with a problem, and this was ours: How can we use our engineering skills to innovate the adult toy market?

While researching our idea of making sex machines, we were unpleasantly surprised with what we found: Sex machines already existed. However, once we tested these machines we quickly found out why we hadn't heard of them before. The machines were weak, loud and not safe enough for home use. A niche market that mainly attracted customers in SM circles. Manufacturers had clearly only focused on the base function of the sex machine, thrusting, but they seemed careless about discretion, convenience, durability and safety.

We decided to take a risk and open up our own studio to start our journey to make better sex available to everybody. The design-, and eventually the production -processes were very difficult and we unwillingly learned what the stars look like at 4AM, every day. But after 4 months of designing and testing we made the C0140 HISMITH sex machine we pictured run and it ran perfectly, like in our dreams.

Hismith's first machine was a fact and it's great quality, stable performance and powerful yet silent thrusting became strongly loved by people around the world.

HISMITH goes on, ultimate pleasure goes on.

Warnings and precautions

- The machine and accessories are not waterproof, please do not use the machine in wet places. Do not touch the power plug with wet hands, this can cause an electric shock.
- Don't idle the machine in high speed to avoid accidental injury.

Federal Communications Commission Notice

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
