

HISMITH® CAPSULE

Our story

Innovation and technology are steadily making our lives easier and more enjoyable. Machines have already taken over 90% of the jobs that us humans used to do. So, we figured: why not blow jobs?

When we started, in our opinion, little innovation was happening in the sex toy market. Sure, toys may have become more compact and better looking, but at the end of the day, you still needed to do the job yourself. We were only a bunch of horny engineering students back then, but we just knew there had to be a better way.

We started Hismith to make ultimate pleasure available to anybody, anywhere, with the touch of a button. We take great pride in creating our premium sex machines. Experience harder, better, faster and longer sex than any human can ever offer you.

Our brand new Hismith APP offers you full control of your Hismith device(s) through your smartphone. The app adds another layer of features and functionalities such as: Giving control of your sex machine to someone else, easily designing and saving your own sex machine programs, a social section to find others to play with and much more.

HISMITH, ultimate pleasure.

PRODUCT SPECIFICATION			
PRODUCT NAME	CAPSULE	DEPARTMENT	HISMITH

§ 15.19 Labelling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

§ 15.21 Information to user.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. -Consult the dealer or an experienced radio/TV technician for help.

*** RF warning for Portable device:**

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
