

# Remote Controller

## Model: Remote

The new high-power remote control features a luxurious and fashionable appearance, with independent button design and imported buttons, providing a good touch and long service life. It is equipped with an external rod antenna to enhance transmission distance, and can be optionally equipped with a fixed bracket for easy installation and placement.

Widely used in industrial equipment control, motor switch on/off, forward and reverse rotation control system, remote control distribution box, remote control light switch, remote control barrier gate, obstacle machine, elevator, remote industrial control, and security industry remote control, etc.

Product parameters:

1. Working voltage: 24V
2. Working current: 10A
3. Radiation power: 25mw
4. Modulation method: ASK (amplitude modulation)
5. Transmission frequency: 315MHz (sound meter stable frequency)
6. Transmission distance: 1000 meters (in open areas without interference, the sensitivity of the receiving device is negative 105 dbm)
7. Encoder type: Fixed code (learning code can be customized)
8. Usage: Motorcycle, car anti-theft products, home anti-theft products, long-distance wireless remote control products
9. Encoding method: EV1527
10. Size: 92mm x 40mm x 15mm
11. The remote control comes with a battery, with a default frequency of 315M and a white outer shell color. Other frequencies and outer shell colors can be customized. Please contact customer service.

## FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
