How to use the Products

1. Charge the phone: connect the charging head to the wireless charging input Type-C port, the wireless charging indicator blue light is on for 3 seconds. The wireless charger enters standby state, put the phone in the wireless charging area, the indicator light is blue and always on, indicating that the phone is charging normally. The phone is full, the blue light is off; if the phone is charging abnormally, the blue light flashes rapidly.

2. Watch charging: Please put the watch module up and place the watch in the wireless charging area of the watch to align with the magnet, you can see the charging indication of the watch display light up. The charging indication on the watch display lights up, indicating that the watch is charging normally.

About the FCC

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

This device complies with part 15 of the FCC rules operation is subject to the following two conditions:

- (1) this device may not cause harmful interference.
- (2) this device must accept any interference received including interference that may cause undesired operation.

FCC Warning:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against

harmful interference in residential installation. This equipment generates uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions may cause harmful interference to radio communications.

However there is no guarantee that interference will not occur in a particular installation if this equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment off and on. The user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
