

Instructions

1. Press and hold the power button for 3 seconds to turn unit on or off
2. Press backlight button to turn on/off the backlight
3. Press and hold the backlight button to switch between C and F
4. To charge the temperature gauge, gently rotate the top portion of the gauge 1/8 turn counter-clockwise and separate from the probe. Use included charging cable to recharge the unit using USB or a wall socket. The battery charging indicator will cycle from empty to full until the unit is fully charged
5. While the top portion of the unit is detached for charging, protect the probe from the elements by using the attached cover
6. Install Bluetooth Dome Thermometer from The Big Green Egg, Inc. in Apple App Store or Google Play Store. With thermometer powered on, open app and click "Search Equipment." The app can be used to set min and max temps, choose alarms, and set a timer

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
