6. How to mount your doorbell

Method 1: Attaching to a smooth wall surface

1. Stick the double-sided 3M stickers on the bracket (rain cover).

2. Tear off the protective film on the 3M sticker, apply it on a smooth wall surface at the appropriate height. Hang the device on the bracket from top down lining up the hole at back of device. Tighten the screw on the

Method 2: If you want install the device on a rough wall (such as concrete, brick or a wooden surface), use screws to fix the bracket.

1. Line up the bracket at your desired location on the wall and mark your drill points within the top and bottom holes.

2. Using a drill and suitable drill bit, tighten the bottom screw into the surface until secure. Repeat for the top hole. Then insert doorbell into the bracket and affix security screw.

-14-

7. Charging Your Doorbell

- Loosen the screw at the bottom of the doorbell and remove the doorbell from bracket. You will hear the alarm sound for approx 1 minute.
- Take the device inside for charging. Using the supplied micro USB cable, connect the device to a 5V/2A USB power adaptor and allow the unit to charge for a minimum of 4 hours. (For convenience, you can use the USB adaptor of your mobile phone)

-15-

FCC Information

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates,

uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference

to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does

cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is

encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance of 20 cm between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
