II. APP Binding

1. APP download

1.1 Scan the QR code to download the APP

1.2 For Android users:

Search "WearPro" in Google Play or any customized Android Stores to download, pay attention to the phone pop-up box and tap "Agree" to give the permissions to the APP when installing;

1.3 For iOS users:

Search "WearPro" in APP Store to download, pay attention to the phone pop-up box and tap "Agree" to give the permissions to the APP when installing;

After WearPro is installed, the application icon is shown as:

2. Connect APP through mobile phone Bluetooth

2.1 Search for Bluetooth name to connect/pair

Scroll down the watch face, find the icon "About (i)" and click it, and remember the Bluetooth name of the watch; then open the APP WearPro, click on "Device" at the bottom bar, and click on "Search to bind device" to start searching. Find the Bluetooth name of your watch and pair it. If the connection is successful, the Bluetooth icon of the watch will light up green (in the middle of the icon);

2.2 Scan QR code to connect/pair

Scroll down the watch face, find the icon "About (i)" and click it, you can see a QR code for connection, then open the APP WearPro, click on "Device" at the bottom bar, select "Scan to bind device", the pairing box will pop up after scanning the QR code. Click "Pair" to bind the APP to the watch. Remember to agree to the apps notification permissions on the watch;

2.3 Connection Precautions

- 1) If you can't connect to the Bluetooth, see if you can find the Bluetooth name of the watch in the mobile phone settings;
- 2) Check whether the permission of your mobile phone location(GPS) is enabled;
- 3) Whether the watch has been bound by other mobile phones;
- 4) Turn off the Bluetooth on the phone and turn it on again;
- 5) Restart the phone;
- 6) Go to the Bluetooth settings on your mobile phone, find the Bluetooth name of the watch, disconnect with the watch by forgetting the device, then go to the APP to rebind.
- 7) Too many devices connected to the mobile phone can lead to the Bluetooth connection failure of the watch. The number of devices that can connect to a mobile phone is limited, please stay no more than 3 frequently use devices connected to the Bluetooth of a mobile phone.

3. Connect to the audio/calling Bluetooth of the watch:

Open the Bluetooth settings of your mobile phone, swipe to the right when the watch is on the dial interface, click the "BT call" icon, then click "Open" to see the name of the audio/calling Bluetooth. Find the Bluetooth name in the Bluetooth list of the phone and pair; after the audio/calling Bluetooth is connected, the Bluetooth icon of the watch is displayed as (the outer periphery) lights up in blue;

Tip: Based on this connection, make sure to tap on various APP notification synchronization permissions in WearPro settings, to realize synchronously viewing of various messages from mobile phone on the watch; to realize all connection functions(like making a phone call through watch), make sure that the watch is connected to both the APP and the audio Bluetooth of the phone.

4. Unbind Bluetooth connection from the APP

4.1 Android system unbind Bluetooth from the APP

In the "Device" column of WearPro, scroll down to the "Unbind" and click to unbind the App;

4.2 IOS system unbind Bluetooth from the APP

In the "Device" column of WearPro, scroll down to "Unbind" and click to unbind the App; then go to the Bluetooth settings of the phone, select the Bluetooth name of the smart watch, and click "Forget this device".

5. Unbind audio Bluetooth connection

To disable the audio Bluetooth connection, find the name of the audio Bluetooth in the Bluetooth settings of the mobile phone, and click "Ignore this device" to unbind all Bluetooth connections with the watch.

6. Find the device

The watch is successfully bound to the app. Click to find the watch on the APP, and the watch will vibrate once when the screen is on.

7. Take a photo

Tap "Take a photo" in the column of "Device" in the app to enable the camera remote control feature on the watch. Tap the camera icon on the watch to control the phone to take a photo, and photos you take will save in the album of the mobile phone.

8. Data synchronization

The watch is successfully bound to the APP, and the data from the watch can be synchronized to the app.

9. Tilt your hand to wake the screen

Wear the watch correctly on your wrist (left/right hand). When you turn on “Tilt to wake” feature on the APP, the watch will light up automatically when you tilt your hand to look at the watch.

10. Do not disturb mode

In the APP, tap “Device” > “More” > “Do not disturb mode”, set the start to end time, such as 12:00 to 14:00, then you won’t receive phone calls and apps notifications on the watch during this period.

11. Daily alarm clock

In the APP, tap “Device” > “More” > “Alarm setting” > “+”, set the alarm time, and the days weekly it will repeat.

12. Sedentary reminder

Set the time period, reminder frequency, and repeat mode to decide how you would like to have sedentary reminders.

13. Drink water reminder

Set the time period, reminder frequency, and repeat mode to decide how you would like to have the drink water reminders.

14. Watch face push

14.1 Push an existing watch face

Bind the watch and the app, open the app, tap Device > Watch face push, the watch will restart and bind the APP automatically after the synchronization of the watch face.

14.2. Customize the watch face

Bind the watch and the app, open the app, tap Device > Watch face push, the first several watch faces marked with “custom watch faces” are customizable. The watch will restart and bind the APP automatically after the synchronization of the watch face.

15. Firmware version

The version of the watch is displayed on “Firmware upgrade” in the column of “Device”, and users can decide to whether upgrade the firmware version.

16. QR code of Alipay payment

The watch has the feature of Alipay, which requires the phone to scan the code to verify binding. Follow the steps below:

Click the Alipay icon on the main interface(scroll down screen) of the watch, and complete the binding with your personal Alipay account.

● **Use and maintenance advice**

- 1. Keep the device clean;**
- 2. Keep the device dry;**
- 3. Wear the watch correctly, do not wear the device too tightly;**
- 4. Avoid prolonged exposure to extreme temperatures that are too cold or too hot, which may cause permanent damage to the device.**

● **Frequently asked questions and answers**

***Why can't I wear the watch to take a hot bath?**

The temperature of the bathwater is relatively high, which will produce a lot of water vapor, and the molecular radius of water vapor is small, so it is easy to penetrate through the gap of the watch case. When the temperature is cooling down, water vapor will turn back to the water, causing the short-circuit of the watch possibly.

***Unable to turn on and charge**

If the watch does not turn on when you receive it, it may be that a collision during the transportation leads to the protection of the battery board. Charge the watch to activate it.

If the watch battery is too low, or can not turn on for being not used for a long time, please charge it for more than half an hour to activate it.

Warranty description:

1.If there are any quality problems caused by manufacturing, materials, design, etc. in normal use, the motherboard of the watch is guaranteed for repair for free within one year, while the battery and charger within half a year from the date of purchase.

2. No warranty is provided for failures caused by the user's personal reasons, as follows:

- 1). Failure caused by unauthorized disassembly or modification of the watch.**
- 2). Failure caused by accidental fall during use.**
- 3). All man-made damages or the third party's fault, or misuses (such as: water in the device, cracking by external force, scratches on the case, damage, etc.) are not covered in the warranty.**
- 3. When requesting the warranty service, please provide a warranty card with the date of purchase and the stamp of the place of purchase on it.**
- 4. When the user needs the device repaired, please take the device to our company or our company's dealership.**
- 5. All functions of the device please refer to the actual product.**

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
