FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions : (1) this device may not cause harmful interference, (2) and this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines,This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.

Instructions

01 | Installation

- Remove the feeder from the box.
- Place the feeder in the suitable location.
- Combine the food tray with the base of the feeder.

02 | Connect the power supply

- Plug the 5V/1A power adapter into the wall socket and connect the device.
 - Open the battery compartment at the bottom of the feeder and install 3 pcs D size batteries (not necessary) to prevent power failure
 - The LED light is turn on to indicate that the feeder is powered on.
- Note:
Does not including battery .
Before turning on the power, make sure that all parts are clean and completely dry.

03 | Put pet food into food tank

- Fill the food tank with dry pet food then close the lid.
- Note:
Do not place canned, wet or wet pet food.
The recommended pet food size range is 3-10 mm.

04 | Recording

- Long press for 1s until you hear "di" and start recording. The recording time does not exceed 10s, After you release your hand, you will hear "didi" to indicate that it has been saved. If you are not satisfied, you can repeat this step to replace the previous recording.
- note:
1) Recording will be played by pressing the recording button
2) Recording will be played when feeding

5 | Lock/unlock button

- Under unlock state, Long press for 6 seconds and the red indicator light flashes twice to lock the machine, then long press again for 6 seconds and the red indicator light flashes 2 times to unlock.

07 | Reset

- Reset(Switching the network configuration mode): When the power is turned on and the network is not configured, the white indicator flashes quickly by default (WiFi quick connection configuration mode), press and hold this button for 7 seconds until you hear "di-didi" beeps, The red/white indicator is always on for 6 seconds and then switches to slow flashing (hot spot network configuration mode). Repeat the operation to switch between the two network modes.

Smart Life APP specific operations

1. Download the App, register a dedicated account and log in

2. Enter the App and click "Add Device"

3. First open your phone Bluetooth and allow permissions. After entering the interface, wait for the device to be discovered automatically, then click "add"

4. Enter the WiFi password. Note that the name and password do not contain Chinese or special symbols, and support 5GWIFI.

5. Waiting for the device to connect the network, successfully added-next step

6. Then you can customize the name of the device and click on the upper right corner to finish this step

7. Enter the main interface, you can choose the meals and portions as needed, click "Feed" to feed immediate

8. Click on the Main Interface "Feed Plan" to add feeding schedule

9. Add timing, set feeding time and number of meals. Select the time, repeat the selection to every day, and select the number of servings per meal

10. Back to the main interface. Please click the icon in the upper right corner to enter the settings option

11. Then Click "Share Device"

12. Click "Add Sharing" to share the device with multiple people.

Simple Troubleshooting

- Q: Cannot be configured
A: 1) WiFi name and password should not be in Chinese, and should not exceed 12 digits. Please use a combination of numbers and letters to support 2.4G/5G WiFi signals.
2) Some software conflicts in the mobile phone will also cause the network connection to fail. Please restart the mobile phone, close the non-system software that starts automatically when you turn it on, turn on the mobile phone's Bluetooth and positioning, and then try to reconnect.

- Q: The feeder is inaccurate or unable to feed
A: Please check whether there is too much food on the food tray and whether the food outlet is blocked; usually clean the food outlet and food channel in time; when using battery power, please check whether the battery is dead and whether the battery is leaking.

- Q: The feeder displays offline
A: Please check whether the distance between the feeder and the router at home is more than 10 meters (effective distance is 10 meters); try not to partition the wall in the middle. According to the WiFi characteristics, the WiFi signal of the partition wall will drop sharply, and the connection will become unstable, which will cause the product to be offline.

- Q: No response when turn on the feed
A: First check that the feeder is plugged in and the switch is on. If they are all plugged in, please check whether the power adapter and power cord are damaged, and contact customer service to handle.

Hotspot distribution network (optional)

- Please follow the button instructions to switch the network distribution mode to hot distribution network, the LED light flashes slowly, the specific operation steps are as follows:
1. Open the Smart Life APP, select Add Device - Manually Add - Small Appliances - Pet Feeder (Wi-Fi) - Enter the WiFi Password Next - Click "Next", select Slow Flash - Click "Connect" - then go to connect SmartLife -XXXX WiFi signal.
2. After connecting, return to the previous interface, and then enter the network configuration interface to wait for the connection.
