Product Overview

Quick Instructions

1. Enable the device

a) Activating for the first time:
After activating for the first time, the device will emit a series of beeps: "di-di-di-di". This indicates that the device is enabled.
b) Enabling after power off:
Press the button once, and the device will emit a single beep: "di~". This indicates that the device is enabled.

2. Pair the device

Open the Find My app.
Hold the device close to your iPhone, tap the Items tab, tap +, and then Add Other Item.
Tap Connect.
Type a name for your device, and select an emoji.
Tap Agree to acknowledge that this item will be linked to your Apple ID.
Tap Finish.

3. Enable Lost Mode

Open the Find My app, tap the Items tab, then tap your item.
Under Lost Mode, tap Enable.
Read the instructions, tap Continue, and enter a phone number or email address.
Confirm the information, customize the lost message, and tap Activate to complete the setup.

4. Remove the device

Open the Find My app, tap the Items tab, then tap your item.
Tap Remove item and then tap Remove to complete the operation.
Note: After removing the device from the app, it will beep. It will not shut down and will be in pairing mode. If there is no re-pairing within 10 minutes, the device enters the pairing state again.

Instructions for device button

1. Power on

After installing the battery, the device will beep, and the device will be turned on.

2. How to turn on the device has been turned on?

Double click the device button, and the device will beep: "DL" indicating that the device is working. If the device emits a power-on tone, the device was previously off and is now on.

3. How to turn the device into the pairing state again?

If any Find My network device separated from its owner is seen moving with you over time, you'll be notified.
Find My will notify your Apple device if you have an iPhone, iPad, or iPod touch. This feature is available on iOS or iPadOS 14.5 or later.

4. Remove the device

Open the Find My app, then tap your item.
Tap Remove item and then tap Remove to complete the operation.
Note: After removing the device from the app, it will beep. It will not shut down and will be in pairing mode. If there is no re-pairing within 10 minutes, the device enters the pairing state and can be paired with the app again.

3. Factory Reset

First, remove the item from the Find My app. Then, after the device is powered on, click the device button 5 times, and hold the button for 3 seconds until the device beeps. Release the button (finish the operation in 5 seconds) to complete the factory reset. The device can now be paired.

4. How is my privacy protected?

Only you can see where your item is. Your location data and history are never stored on the item itself. Devices that relay the location of your item also stay anonymous, and that location data is encrypted every step of the way. So not even Apple or Nutag knows your device's location or the device's identity that helps find it.

5. How to replace the battery?

1) Open the device from the notch side.
2) Replace the battery with a new one. (Positive pole upward).
3) Assemble the device, and the device is ready to use.

6. What is the Find My Network? And how does it work?

The Apple Find My Network allows users to locate compatible items on a map using the Find My app on your iPhone, iPad, iPod touch, or Mac or the Find Items app on Apple Watch. Pair your compatible product with the Apple Find My app to view it alongside your Apple devices. If your item ever goes missing, you can put it in Lost Mode to display a message and contact information to anyone who might find it. The Find My network is encrypted and anonymous, so no one else, including Apple or Nutag, can view its location.

FAQ:

1. When can the device be located?

When an item is separated from its owner for some time, it can be found by other Apple devices that are part of the Find My network, and the owner can start to get the device's location.

2. Play Sound

Open the Find My app, tap the Items tab, then tap your item.
Click Play Sound, and the device will beep so that you can find the item easily.

3. Instructions for the device button

1. Power on

After installing the battery, the device will beep, and the device will be turned on.

2. How to turn on the device has been turned on?

Double click the device button, and the device will beep: "DL" indicating that the device is working. If the device emits a power-on tone, the device was previously off and is now on.

3. How to turn the device into the pairing state again?

If any Find My network device separated from its owner is seen moving with you over time, you'll be notified.
Find My will notify your Apple device if you have an iPhone, iPad, or iPod touch. This feature is available on iOS or iPadOS 14.5 or later.

4. Remove the device

Open the Find My app, then tap your item.
Tap Remove item and then tap Remove to complete the operation.
Note: After removing the device from the app, it will beep. It will not shut down and will be in pairing mode. If there is no re-pairing within 10 minutes, the device enters the pairing state and can be paired with the app again.

Regulatory Safety Information

European Union-Detailed Information

FCC FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure conditions without restriction.

NOTE:
This equipment has been tested and found to comply with the limits for a Class B device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.

Important tips:

when pairing a device with the Find My app, the phone will link to the Apple device. Pairing may fail because of network problems. The following actions are recommended:
1. Change the phone's network, such as switching between WiFi and mobile network.
2. Factory Reset for the device: when the device is powered on, click the button 5 times, and hold the button for 3 seconds until the device beeps (the same tone as a power-on tone). Release the button (finish the operation in 5 seconds) to complete the factory reset.
3. Pair with the Find My app.
