

Differences Description

We Chongqing Huiye Iot Technology Co., Ltd. state:

Product: LCD Display

Model Name: B04N-US, B04N-U, B04N-C

Brand Name: HUIYE

FCC ID: 2A5B3-B04N

Both of models have the same circuit schematic, construction, PCB Lavout. The differences are as follows:

B04N-U: The interface is UART, and components marked as UART and unmarked in the schematic diagram need to be SMD, while other components do not need to be SMD.

B04N-C: The interface is CAN, and components marked as CAN, CANIF, and unmarked in the schematic diagram must be SMD, while other components are not SMD.

B04N-US: The interface is UART, and components marked as UART, ISO13849, and unmarked in the schematic diagram must be SMD, while other components are not SMD

Their RF parts are the same, but the different EUT interfaces result in different positions of some components; The report has reflected the difference test results.
Sincerely,

Company: Chongqing Huiye Iot Technology Co., Ltd.
