

User Manual-G3-3791200A-D1:

Click the panic key for 1.5s to find the car

Click the key for unlocking the car

Click the key for locking the car

When the indicator light is normally on, it indicates that the electronic smart key is working normally; when the indicator light is dark, it indicates that the battery power is too low or the signal is too weak.

The main parameters:

RF center frequency	433.70-433.95MHz
RF modulation type	ASK
RF transmit power	near field-9dbm ~ 10dbm
LF center frequency	125±3KHz
LF modulation type	ASK
Protection class	IP5K7
Remote control distance	≥30m
Standard voltage	3V
Voltage range	2.65V ~ 3.6V
Quiescent current	≤6uA
Operating current	≤20mA

FCC Warning:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
