PARTS LIST

① Starry light ② RGB light ③ Lamp base

Base type: E26/E27/B22

BEFORE USE

Inside packaging:
Smart Star Light Bulb x1
User Manual x1

How to begin?

- Connect the Smart Star Light Bulb to an available standard E26/E27/B22 Edison Screw Lampholders.
- Connect to WiFi.

How to connect to Wi-Fi network?

- Download Smart Life from **App Store** or **Google Play**. Download or scan the QR code and install the Smart Life App for either iOS or Android. Once downloaded, the app will ask you to register your device. Enter your phone number or email which one makes you feel comfortable and select the country you live in. If use phone you will receive a text with a registration code. If you choose email you will then create a password.

Please note: there are two mode configurations.

(Bluetooth Mode/Quick Mode) available for you to choose from to add the device to the app. Bluetooth Mode is recommended (turn on your phone's GPS).

Select 2.4GHz WiFi network and enter password if network is 5GHz, please switch to 2.4GHz network.

Bluetooth Mode Configuration(Common)

- Turn on your phone's Bluetooth, press the switch "on-off-on-off-on" continuously (Keep time interval not too short, turn off after the light is on), and the Smart Star Light Bulb will be flashing quickly. It automatically says "Device to be added" then press "Go to add".

Quick Mode Configuration

- Make sure quick mode configuration is initiated: First, connect the bulb to the power source. Then, press the switch "on-off-on-off-on" continuously (Keep time interval not too short, turn off after the light is on), and the Smart Star Light Bulb will be flashing quickly.
- Tap the light "+" on the top right, click "Add Manually" button to choose Light Source(Wi-Fi).

Please confirm the light is linking rapidly.

- Follow the in-app instructions to connect the Smart Star Light Bulb to your Wi-Fi network.

How to connect Smart Star Light Bulb to Amazon Alexa.

- Launch Smart Life App, sign into your account and make sure Smart Star Light Bulb is on the device list.
- Minimize Smart Life App, then launch the Alexa App and sign in your Alexa account and make sure you have at least one Alexa smart speaker-controlled device installed like Echo dot, etc.
- In the upper left corner of Home page, press the "+" button to show APP Menu. Then select "Alexa" in the menu.
- Type in "Smart Life" in the search and press the search button next to it.
- Enable Smart Life Smart Skill then sign in your Smart Life account to complete your account set up.
- Once your account has been successfully linked, ask Alexa to discover devices. After a 20-second searching, Alexa will show all the available devices.

How to connect Smart Star Light Bulb to Google Home.

- Launch the Google Home App and make sure Google Home speaker is installed. If not, please follow Google Home speaker installation instruction to complete the installation.
- Once Google Home is installed, in the upper left corner of App Home page, Pressing "+" button to show App menu. Then press "Home Control" in the menu.
- After successfully linking your account, in the Google Home App you can see all your smart devices from your "Smart Life App account". You can assign rooms for each device.
- Now you can use Google Home to control your smart device, you can say like:
"Ok Google, turn on/off smart light"
"Ok Google, set bedroom light to on"

How to connect Smart Star Light Bulb to Google Home.

- Launch the Google Home App and make sure Google Home speaker is installed. If not, please follow Google Home speaker installation instruction to complete the installation.
- Once Google Home is installed, in the upper left corner of App Home page, Pressing "+" button to show App menu. Then press "Home Control" in the menu.
- After successfully linking your account, in the Google Home App you can see all your smart devices from your "Smart Life App account". You can assign rooms for each device.
- Now you can use Google Home to control your smart device, you can say like:
"Ok Google, turn on/off smart light"
"Ok Google, set bedroom light to on"

How to connect Smart Star Light Bulb to Google Home.

- Launch the Google Home App and make sure Google Home speaker is installed. If not, please follow Google Home speaker installation instruction to complete the installation.
- Once Google Home is installed, in the upper left corner of App Home page, Pressing "+" button to show App menu. Then press "Home Control" in the menu.

FAQ

- What should I do if I can't turn off or turn on the Smart Star Light Bulb?
---Make sure your cellphone and the Smart Star Light Bulb are connected to the same WiFi connection.
- What should I do when the configuration fails?
---Make sure to connect your Smart Star Light Bulb within a short distance of your internet router. Check whether the available internet network has a frequency of 2.4GHz. Check your internet connection is working properly.
- How can I share devices with my family members?
---Open the Smart Life APP, select "Profile" > "Devices Sharing" > "Share" select "Add Sharing", now you can share with your family members.
- Can this APP be used on any type of mobile phone? Can I control the device from a distance?
---Yes, the APP can work with both android & IOS systems. Once connected to the Internet, there is no distance limitation.
- Can I control the devices with a 2G/3G/4G connection?
---The Smart Star Light Bulb devices must be registered first on a WiFi network, after you have successfully connected it, then the Smart Star Light Bulb can be controlled by your Smart Phone with 2G/3G/4G networks.
- Will it cause a fire or other safety hazards if kept on all night?
---No, it will be safe to use all night.
- Can I adjust the brightness on this?
---Yes, you can adjust the brightness on the APP.
- Will it cause indirect laser light damaging to eyesight?
---Please do not look directly into the laser.
- If projected on a ceiling, what is greatest width and height of the projected image?
---That depends on the height of the object you place it on.

FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
