HD Wireless Camera Clock

Discreet camera for all your surveillance needs

Family use Store use Indoor use

Quick start guide

Before Setting Up

1. Make sure the DHCP function of your router is turned on and supports 2.4GHz band for your clock-cam to connect to. (5GHz is not supported for this device)

2. Make sure your smartphone is connected to the same 2.4GHz network that you're connecting your clock-cam to.

3. Please make sure Location Services is turned on. For iPhone, go to **Settings => Privacy =>** Location Services to enable it.

4. MrCam will prompt for permission to use "your location for obtaining the WI-FI name", please select **Allow While Using App**.

5. Please set your phone to ring mode, and allow the app to access your microphone and to send notifications.

Install APP

- 1. Scan the QR code below to install the APP.
- 2. Alternatively, search and download "MrCam" in Google Play or Apple App Store.

How to Use Method 1:Connect to Your Network

The First Step:Press Power Key and hold for 3 seconds to power on the device. Wait for audio prompt" Welcome to use", after 8 seconds, another audio prompt" Please connect to network". The Second Step:Launch the MrCam app. Select Add Device and then select Connect to Wi-Fi.

The Third Step:Wait for audio prompt, "Please connect the network" and then select **NEXT**. **The Fourth Step:**In the next screen, please enter your Wi-Fi password and select **NEXT**.(Make sure your phone is within 10 feet of the clock-cam)

The Fifth Step: Your phone will start sending out a configuration sound wave to the clock-cam. Wait for a voice prompt from the clock-cam to confirm "connection success."

The Sixth Step:Next, select the Add button next to the IPCAM:

The Seventh Step:Congratulations, your clock-cam is now ready for use! For security and privacy, please change your username and password when prompted.

Add

Answer 3:Please reset the device and delete the record of WiFi hot spot, then connect the device again.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which

the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the

following two conditions:

(1) this device may not cause harmful interference, and (2) this device must

accept any interference received, including interference that may cause

undesired operation.
