Status	Functional description
Power on	The camera shakes once after long pressing the OK button, and the blue light is always on in the standby mode.
Power off	The camera shakes twice after long pressing the OK button, and the blue light flashes twice and then shuts down.
Video mode	The camera shakes once after pressing the OK button in the power-on state, and the recording starts. The blue light flashed during the recording. Short press the OK button while recording, the camera shakes and the recording stops. Short press the OK button while recording, the camera shakes and the recording stops. Then back to the recording standby state, the blue light is always on. (When the blue and green lights are always on at the same time, the display is cyan).
Turn on WiFi	The WiFi is turned off by default when you turn camera on, and short press the OK button twice to turn it on. The green light flashes quickly when WiFi is not connected. The green light is always on after connecting to WiFi. If you start recording after connecting to WiFi, the green light is always on, and the blue light continues to blink.
Turn off WiFi	Quickly press the OK button twice, WiFi is off, and the green light is off.
Photo mode	The photo mode can only be used in the APP, switch to the photo mode from APP. The indicator light is always red, and the red light flashes once per shot. (The green light is always on when connecting to WIFI).
Time-lapse mode	Time-lapse work inside APP. The app switches to time-laps, the red and blue indicator lights are always on. The red and blue lights keep flashes when time-lapse until the time-lapse recording ends (as long as the WiFi is connected, the green light will always on)
Low Power	When the battery power is too low, the camera will shake three times. And the red light will flash quickly ten times then camera shut down.
Full Storage Card	When the card is full, the camera shakes for one time. After the blue light flashes quickly for 10 seconds, the camera will automatically shut down.
Charging indicator	The charging indicator light is an independent light. It is on at the small hole next to the card holder. When charging, it is always on, charge full will off.
No card or card error	If no card inserted or card error, the red light flashes quickly, the device will vibrate every two seconds. 10 mins later, the device will shut down auto (the blue light is always on after connecting to pc cam)
Car Mode	Car model works inside the App, and the video will auto start loop recording when connect with car lighter. Unplugging the charger, the video will auto saved, camera turn offer after 10 seconds. When set Card mode inside the App, next time when power on the camera, it will be car mode still. If not connect with car lighter, when power on, it will work as normal camera, no auto recording.
Webcam	Unplug the camera's memory card, and plug it into the USB to connect to the computer when it is turned off. The camera will automatically turn on, and the blue light is always on. No need to install the driver, plug and play (note: the computer with a camera needs to manually select the camera name, the name is: C100/C100+, different systems may vary)

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
