SJ6 PRO Экшн-камера с двойным экраном  
SJ6 PRO双屏运动相机 说明书

# USER MANUAL

Please read this user manual carefully before using the camera for the first time.

## OPERATION SAFETY GUIDELINES

1. This is a high-precision product. Do not drop.
2. Do not expose the camera to strong magnetic fields, such as electric motors, magnets, and machinery that use strong radio waves.
3. Your camera may heat up during use or charging, this is normal. If the camera overheats and/or emits smoke, stop using it immediately and remove the battery or external power source.
4. Always store the camera and accessories in a cool, dry, and dust-free place. Avoid direct exposure to heat sources, high-temperatures, and prolonged exposure to sunlight.
5. This camera model is not waterproof. Never submerge the camera underwater without using a waterproof housing, always check waterproof seals before doing water activities.
6. Always charge your camera away from water, moisture, other liquids, or flammable materials. Keep children and pets away from electronic devices that are charging to avoid accidents.
7. Always store extra batteries in a compartment away from any sharp metals and moisture to avoid shorting the terminals.
8. Make sure not to overcharge your battery, and avoid extended battery charging.

**Do not dispose of the camera or the battery in the garbage bin or in fire. Find a local recycling facility near you for this purpose.**

**If you have any questions, please contact customer service, disassembling the device automatically voids your warranty.**

- Note:** SJCAM Remote Control is sold separately.

## App Download

**iOS**

**Android**

**Scan the QR code on your mobile phone, or go to the Apple Store /Google Play and search "SJCAM zone" to download and install the app.**

### **WiFi connection**

Swipe downward from the top of the screen, click the WiFi icon to turn on the camera WiFi, and the WiFi name and password will be displayed on the screen.

WiFi Name: SJ6PRO\_ XXXXXX

WiFi initial password: 12345678

Turn on the WiFi function on your phone, search and connect the camera WiFi.

Open the app, click "Connect Camera", a preview screen will appear, and the connection will be successful.

After the connection is successful, you can take photos, record videos, settings and other operations from the app interface.

# Operating instructions

## 1. Micro SD card installation

Prepare your MicroSD card for first use by formatting it on the computer, and then Insert It into the device according to the icon direction marked next to the device card slot.

NOTE: Only use a MicroSD card from a reputable brand to avoid data corruption and erratic camera operation.

## 2. Video recording

When you power-on your device, it will Initially go into Video Mode. Short press the OK button to record the video. Short press again to stop. NOTE: The camera will remember the last mode used, and will go into that Mode the next time it is powered on.

## 3. Taking photos

While the camera is on, swipe from the bottom of the screen to show Mode options (as shown in the figure below) or briefly press the power button to enter the Mode Selection Menu. Click the photo icon  to enter the photo mode. Use the OK button to take photos.

## 4. Playback

After the camera is turned on, click the playback icon  in the lower left corner of the screen (as shown in the following figure) to enter the playback mode, select the video / photo to be played back, and then press the OK button to browse.

## 5. Car mode

Long press the power button for 3 seconds to start the device, swipe from the bottom of the screen (as shown in the figure below) or short press the power button to enter the Mode Selection Menu, and click the Car Mode icon to enter the Car Mode video recording.

**Note:** 1. If the camera needs to be installed upside down when using Car Mode, you need to turn on rotation in the system settings. 2. Connect the power adapter to the vehicle. After starting the vehicle, the camera will automatically power on and start recording. After turning off the vehicle, the recording will automatically stop after 10 seconds.

## 6. Charging

Two charging modes.

A. Connect the camera to a phone charger, or plug it to a computer to charge. During charging, the red light at the bottom left of the device will indicate charging, and will go out after the device is fully charged.

B. Remove the battery and charge it with a special desktop charger (sold separately).

**Note:** Make sure to only use a 5V output power adapter.

## 7. Recording settings

A. While the camera is on, click the Settings icon  in the lower right corner of the screen (left in the figure below) or short-press the Setting button to enter the recording setting menu, swipe up or down (right in the figure below) to choose which option you like to set, and click to confirm the selection.

## **B.Recording settings menu.**

**Resolution:** 4K (3840\*2160) 60/30fps                      2.7K (2704\*1520) 60/30fps

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
