### Instructions

#### Bluetooth Mode

#### Laptop Bluetooth Mode:

- Switch from "ON/OFF" button to up (Bluetooth Mode).
- Turn on the laptop Bluetooth function: Setting - Device - Add Bluetooth or other Device - Click Bluetooth - Searching "BT5.1 Mouse" and pair.

#### Tablet Bluetooth Mode:

- (Note: please make sure your tablet operating system is Android 5.0 and later or iOS13 and later).
- Switch from "ON/OFF" button to left (Bluetooth Mode).
  - Click "Settings"--"Bluetooth"--Turn on Bluetooth--Search "BT5.1 Mouse" and pair.

Note: if the Bluetooth cannot connect the mouse or the mouse key does not appear after connecting the Bluetooth, please activate it through this path: Setting - Accessibility - Touch - Assistive Touch - Turn on "Mouse Key".

### Bluetooth Wireless Mouse

### Frequently Asked Questions

- It's out of power if the mouse LED lights stop. Please recharge it.
- After completing the first pairing of the mouse and computer, you do not need to pair it again when you use it later. Turn the mouse switch to the position indicated by Bluetooth and double-click the right button to pair with your computer successfully.
- If the computer cannot find the Bluetooth mouse during pairing, you need to confirm if the switch on Bluetooth mode, then power on the mouse again. Please confirm whether the Bluetooth mouse is connected to other computers. If it is already connected to other computers, please remove the connection firstly, and then follow the above steps to pair again.
- If you don't want to pair with the Bluetooth mouse, in the "Bluetooth and other devices" interface, click the BT5.1 mouse to delete the device and select Yes.
- To save power and provide long-term usage, the wireless mouse will fall asleep after 10 minutes of no-operation. It can be waken up by clicking any button.
- If you do not use the mouse for a long time, please turn off the "OFF" button to save power.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that

interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

The device has been evaluated to meet general RF exposure requirements, the device can be used in portable exposure conditions without restriction
