5.Charging Case

Basic Skills

Power on: When the earbuds is picked up from the charging case, it will be automatically turned on and connected to the connected device in a team. Power off: The earbuds will automatically shut down after being put into the charging case.

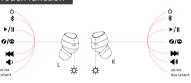

- 1 Turn on the Bluetooth device of the mobile phone
- 2. Take out the left/right earbuds from the charging case and automatically power on, the indicator light flashes blue to enter the pairing state; or press and hold the "multi-function button" for about 3 seconds when the earbuds is turned on, and the indicator light flashes red and blue alternately to enter the pairing state.
- 3. Find the earbuds model "C12" to connect. (To confirm the Bluetooth name)

- 1. When using the earbuds for the first time, remove the insulation label on the earbuds so that the earbuds can be charged normally.
- 2.The earbuds is placed in the charging case and will automatically shut down after the charging state is activated.

3. When the earbuds is picked up from the charging case, it will automatically switch on and automatically connect to the connected Bluetooth device. Automatic Connection:

After the first connection is successful, the next time the earbuds is switch on, it will automatically connect to the last paired phone by default.

Are the following directions of rotation correct? Correct

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that

interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- -- Reorient or relocate the receiving antenna.
- -- Increase the separation between the equipment and receiver.
- -- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

The devices has been evaluated to meet general RF exposure requirement, the device can be used in portable exposure condition without estriction
