2	Power adapter	1 pcs
3	Counter weight	1 pcs
4	45 RPM adapter	1 pcs
5	Turntable mat	1 pcs
6	Two beats	2 pcs (one installed and one spare
7	User guide	1 pcs
8	nstal dust cover	1 pcs

install the metal platter(the beg is pre-installed on the bottom of the metal platter) and a turnisable mat on the metal platter.
 install dust cover.

4. Attach and adjust the counterweight.

3.1 Installing the platter and turntable mat

Note: The belt is pre-installed on the bottom of the metal platter

Turn the platter over and check the belt position
Make sure that the drive belt is looped in the middle of the circle. The drive belt
located too high or too low in this circle may cause the drive belt to fall off or speed
to be unstable.

1.Place the belt on the motor pully.

Align one of the platter openings with the motor pulley, and while pulling both ends of the red ribbon that comes attached to the belt, place the belt on the motor pulley, as per the diagram. When doing this, be careful not to twist the belt

2. Still holding the belt, flip the platter over, then insert the platter onto the spindle

3. Align the round hole in the platter with the pulley and use your finger to hook the

Hodd cooks

Note: When you want to take out the platter from the turntable, remove the mat first, then grasp the platter and pull it upward. This is especially important if you are shipping you
