

Water Leak Detector
product instruction manual

Product Description

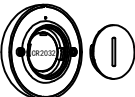

The water leak detector is a device that can detect water leakage and water soaking. It can monitor two states from no water to having water, water to water receding. When water leakage or water soaking occurs, it can be recorded in real time through APP and can pass through the gateway, and other intelligent hardware products can be controlled through the linkage of the gateway device. This product is suitable for residential homes, buildings, factories, shopping malls, office buildings, etc.

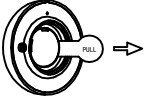

* This product need to cooperate with gateway functionequipment use

Entering the Network Configuration Mode

1. Power on the product.

Insert a thin blade or coin into the slot on the battery cover and rotate it counter-clockwise to open the battery cover.

Remove the battery insulation film to power on the product and close the battery cover.

Installation Instructions

Place the product in the detection area.

Technical Parameters

Product name	Water Leak Detector
Wireless Technology	Zigbee
Undervoltage Alarm	Supported
working temperature	-10°C to +55°C
Working Voltage	3V (CR2032 battery)
Battery Lifespan	More than one year (20 times per day)
Dimensions	50x17

Packing List

- Water Leak Detector x1
- User manual x1
- 3M sticker x1

Warranty Certificate Toxic or Hazardous Substances or Elements of this Product

Component name	Toxic or Hazardous Substances or Elements					
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent chromium (Cr(VI))	Polybrominated biphenyls (PBB)	Polybrominated diphenyl ethers (PBDE)
LED	○	○	○	○	○	○
PCB	x	○	○	○	○	○
Cover and other components	x	○	○	○	○	○

This table complies with SJ/T 11364.

O: indicates that the toxic or hazardous substance amount contained in all homogeneous materials of a component does not exceed that stipulated in GB/T 26572.

X: indicates that the toxic or hazardous substance amount contained in at least one of the homogeneous materials of a component exceeds that stipulated in GB/T 26572.

Warranty Certificate

Warranty policy:

- If the product has quality problems within 7 days of the payment date, you can apply for a refund based on the invoice price or to replace the product with one of the same model.
- If the product has quality problems within 15 days of the payment date, you can apply to replace the product with one of the same model.
- If the product has quality problems within 12 months of the payment date, you can apply to have the product repaired.

What is not covered under this warranty:

- The product owner has no warranty certificate or the warranty service has expired.
- Damage caused by improper use, maintenance, or storage.
- Damage caused by disassembly and repair without Tuya's authorization.
- Damage caused by force majeure.
- Normal discoloration and depreciation after the product has been used.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
