

Quick Start Guide

Personal Mobile Alarm System

- Lanyard hole
- LED light
- SOS button
- Microphone

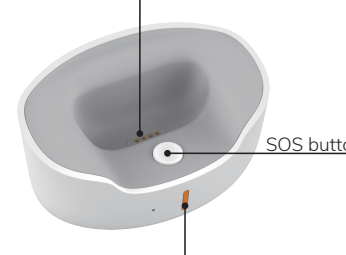

Call button Silent mode button

Screw holes

Charging contacts

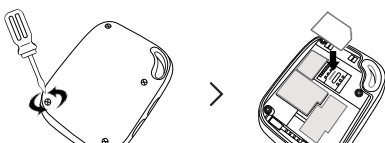

SOS button

LED light

Put the SIM card

The SIM card is not included in the package. A Nano SIM card is available from the user's local operator.

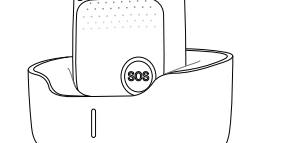

- Unscrew the back cover and remove.
- Insert the SIM card and make sure it's activated with credits.
- Put the cover back and tighten the screws.

TIP Before installing the SIM card, check if the SIM card has PIN code or not. If yes, please use a cell-phone to remove the card's PIN code.

Charging your device

There are two ways to charge your device.

1/ charging base

- Place the device on the charging base.
- Connect the USB cable from charging base to the AC adaptor.

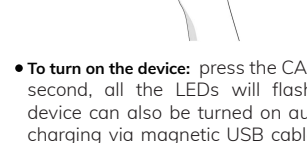

The charging base light will glow when charging and turn solid when fully charged.

2/ Wireless Charging

- A Qi charger provides a quick charging and easy to use.
- The wireless charging pad is not included in the package.

Switching on and off device

- To turn on the device:** press the CALL button for 1 second, all the LEDs will flash rapidly. The device can also be turned on automatically by charging via magnetic USB cable or put it into the docking station.
- To turn off the device:** press and hold the side button and SOS button together for 3 seconds until the LEDs turn off.

FCC & ISDE Statement

This device complies with Part 15 of the FCC Rules and with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Cet appareil est conforme à la partie 15 des règles de la FCC et aux normes RSS exemptées de licence d'Industrie Canada. Le fonctionnement est soumis aux deux conditions suivantes: (1) cet appareil ne doit pas causer d'interférences nuisibles, et (2) cet appareil doit accepter toute interférence reçue, y compris les interférences pouvant entraîner un fonctionnement indésirable.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device meets the exemption from the routine evaluation limits in section 2.5 of RSS 102 and compliance with RSS 102 RF exposure, users can obtain Canadian information on RF exposure and compliance.

Cet appareil est conforme à l'exemption des limites d'évaluation courante dans la section 2.5 du crr - 102 et conforme aux rrs 102 de l'exposition aux rf, les utilisateurs peuvent obtenir des données canadiennes sur l'exposition aux champs rf et la conformité.

This equipment complies with Canada radiation exposure limits set forth for an uncontrolled environment. Cet équipement est conforme aux limites d'exposition aux rayonnements du Canada établies pour un environnement non contrôlé.

Radiation Exposure Statement for Charging Base

This equipment should be installed and operated with minimum distance 0cm between the radiator & your body. Cet équipement doit être installé et utilisé à une distance minimale de 0 cm entre le radiateur et votre corps.

What do the lights mean?

Cellular signal indicator-Green

Green	Light shows a single flash rapidly every 3 seconds	Light shows a double flash rapidly every 3 seconds
Means	The device has a stable cellular signal	The device is registered to the cellular network

Positioning indicator-Blue

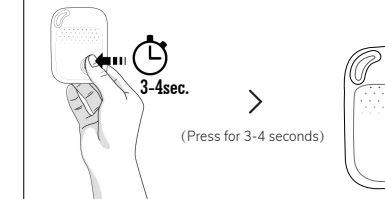

Blue	Light shows a single flash rapidly every 3 seconds	Light shows a double flash rapidly every 3 seconds	Light Off
Means	The device has no latest location fix	The device has latest location fix	The device is not fixing the latest location

Power indicator-Red

Red	Red ON (solid)	Red shows a double flash rapidly every 3 seconds
State	Device has been fully charged	BLE connected

Red	Red Blinking Quickly	Red Off or blinking slowly
State	Battery power is lower than 20%	The device is charging

Activating an SOS Alarm

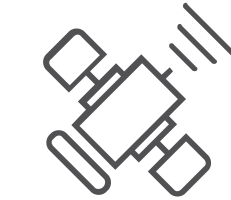

(Press for 3-4 seconds)

When you need help, press the SOS button for 3-4 seconds till you hear a voice prompt of activating an SOS alarm. This starts the sequence of "help me!" text message send to your emergency contact numbers followed by the outgoing calls.

- If the device fails to connect to the first number, it will call the second number after delay of 10 seconds. In case the second number fails to be connected as well, the system will connect to the third number etc.

Getting a GPS fix

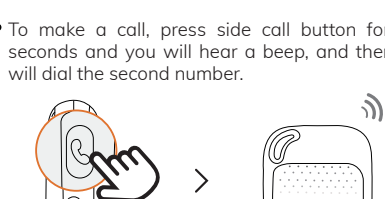

- To get an initial fix for the GPS features, use outdoors or near a window so the device can get a fix on the satellites. This could take few minutes according to your environment.

GPS

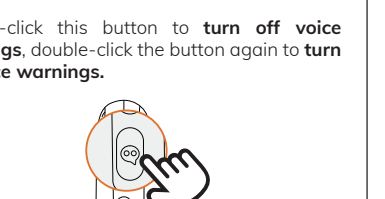

Making a Phone Call

- To make a call, press side call button for 3 seconds and you will hear a beep, and then it will dial the second number.
- To end the call, press the SOS button.

Silent mode button

- Double-click this button to turn off voice warnings, double-click the button again to turn on voice warnings.
- Put device on charging base more than 30 seconds, and they will be paired automatically via Bluetooth.

Specification:

- Dimension: 62mm*47mm*17mm
- Weight: 53g
- Battery: Rechargeable, 3.7V, 1000mAh
- Charging voltage: 5V DC
- Waterproof: IP67
- 4 locating technologies: GPS, BLE, WIFI, LBS

Cautions:

Please comply with the instructions to extend the unit life:

- Don't use & store the unit in dusty places.
- Don't put the unit in overheated or over cooled places.
- Clean the unit with a piece of dry cloth. Don't clean in chemicals, detergent.
- Don't disassemble or refill the unit.
- Using other batteries will cause unwanted situation.

Warning: Keep the IMEI and SIM in confidential, or your privacy may expose.

Radiation Exposure Statement for Personal Mobile Alarm System

Specific Absorption Rate (SAR) Information:

This Personal Mobile Alarm System meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. FCC/ISED RF Exposure Information and Statement the SAR limit of FCC/ISED is 1.6 W/kg averaged over one gram of tissue. Device types: Personal Mobile Alarm System has also been tested against this SAR limit. This device was tested for typical body-worn operations with the back of the Personal Mobile Alarm System kept 15mm from the body. To maintain compliance with FCC/ISED RF exposure requirements, use accessories that maintain an 15mm separation distance between the user's body and the back of the Personal Mobile Alarm System. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. These accessories that do not satisfy these requirements may not comply with FCC/ISED RF exposure requirements, and should be avoided.

Informations sur le débit d'absorption spécifique (DAS) :

Ce système d'alarme mobile personnel répond aux exigences du gouvernement en matière d'exposition aux ondes radio. Les directives sont basées sur des normes élaborées par des organisations scientifiques indépendantes grâce à une évaluation périodique et approfondie d'études scientifiques. Les normes comprennent une marge de sécurité substantielle conçue pour assurer la sécurité de tous. Informations et déclaration FCC/ISED sur l'exposition aux RF la limite SAR de la FCC/ISED est de 1.6 W/kg en moyenne sur un gramme de tissu.

Le système d'alarme mobile personnel a également été testé par rapport à cette limite SAR. Cet appareil a été testé pour des opérations typiques portées sur le corps avec l'arrière du système d'alarme mobile personnel maintenu à 15 mm du corps. Pour maintenir la conformité aux exigences d'exposition RF FCC/ISED, utilisez accessoires. L'utilisation d'accessoires qui ne satisfont pas à ces exigences ne peut maintenir une distance de séparation de 10 mm entre le corps de l'utilisateur et l'arrière du système d'alarme mobile personnel. L'utilisation de clips de ceinture, d'étais et d'accessoires similaires ne doit pas contenir de composants métalliques dans son sont conformes aux exigences d'exposition RF FCC / ISED et doivent être évités.
