

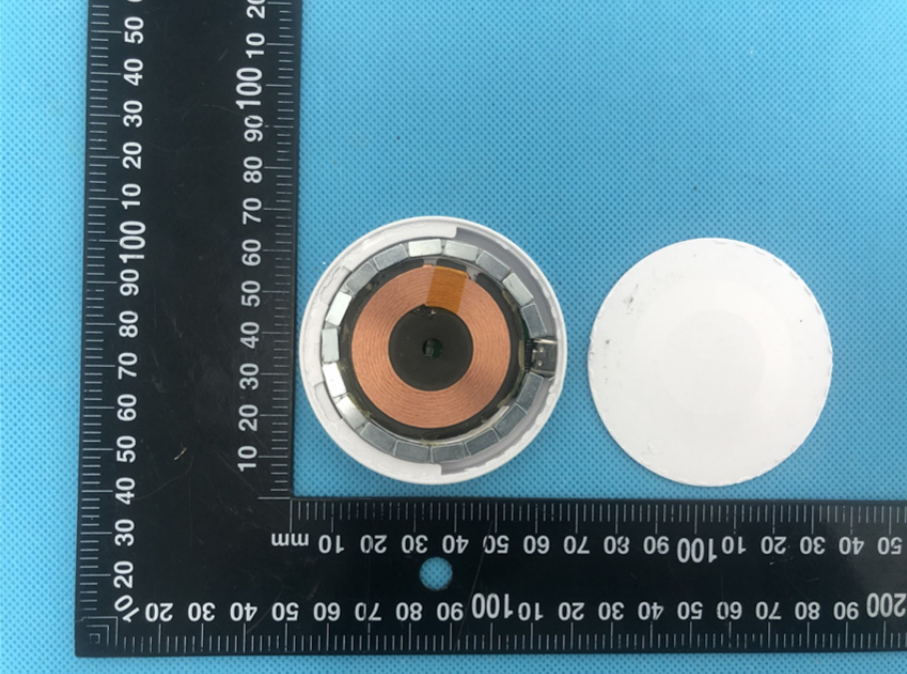

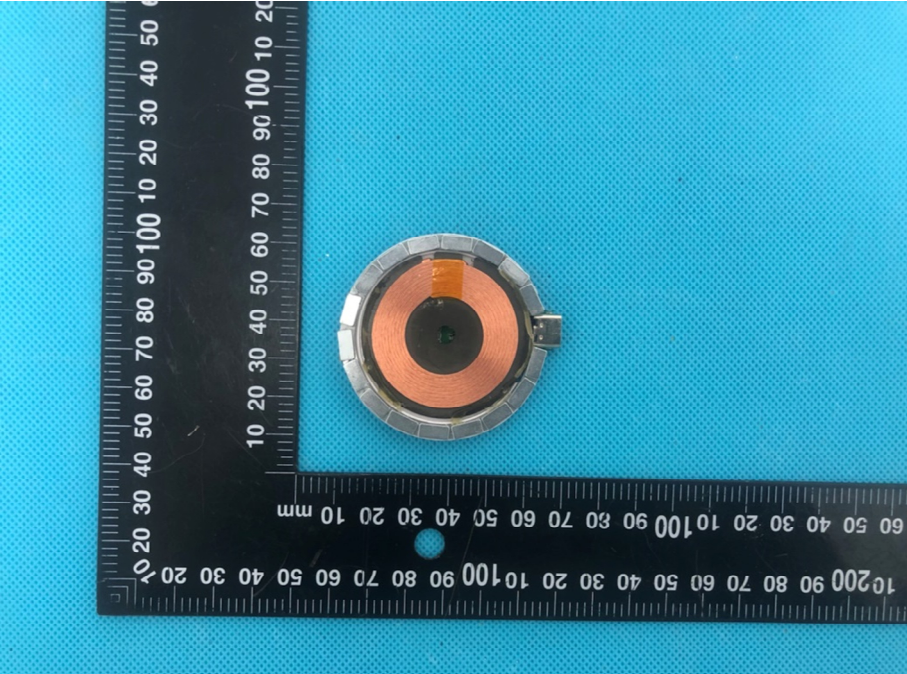

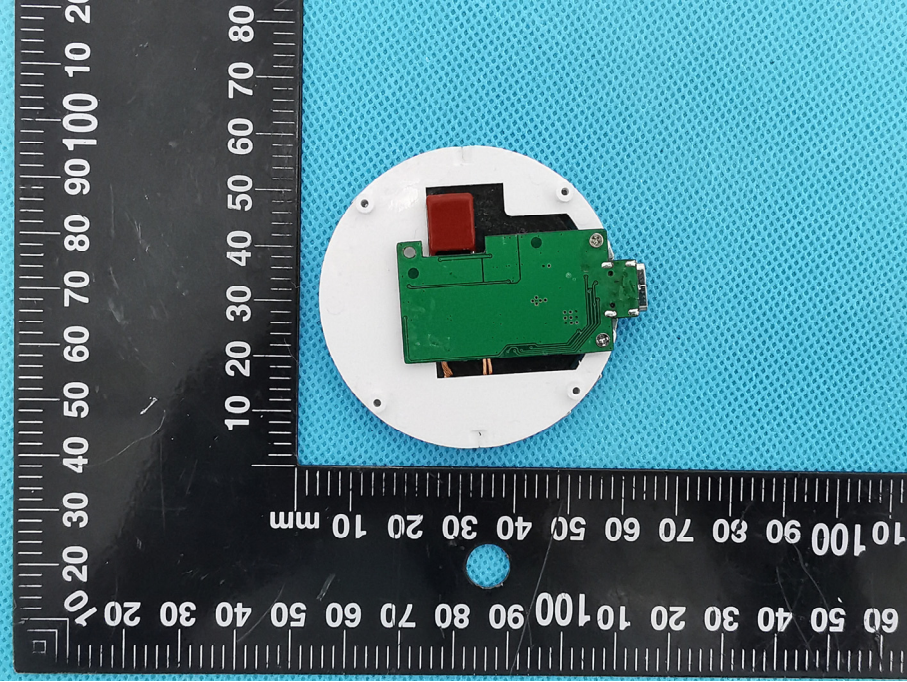

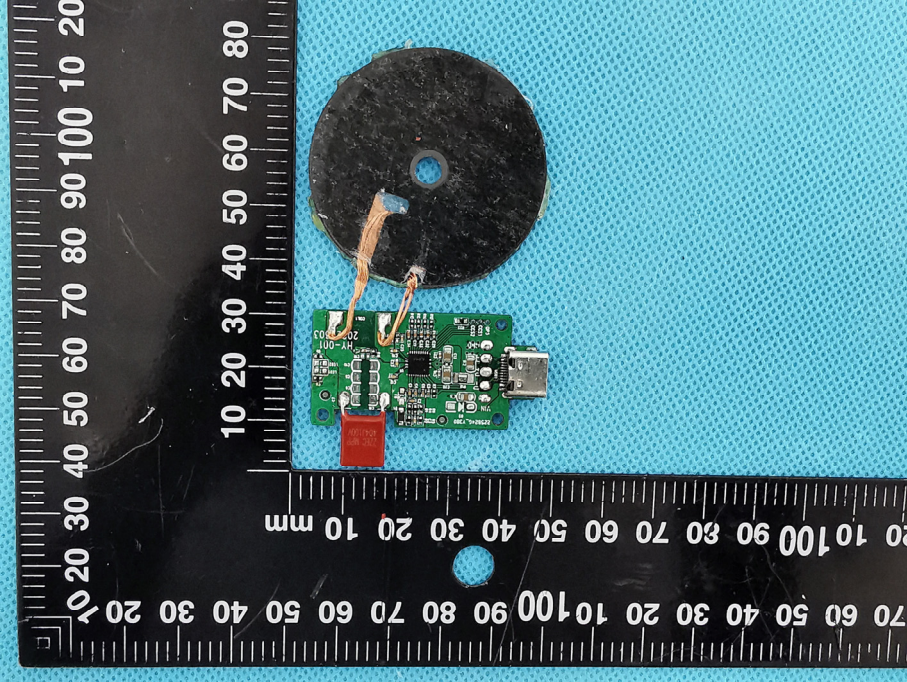

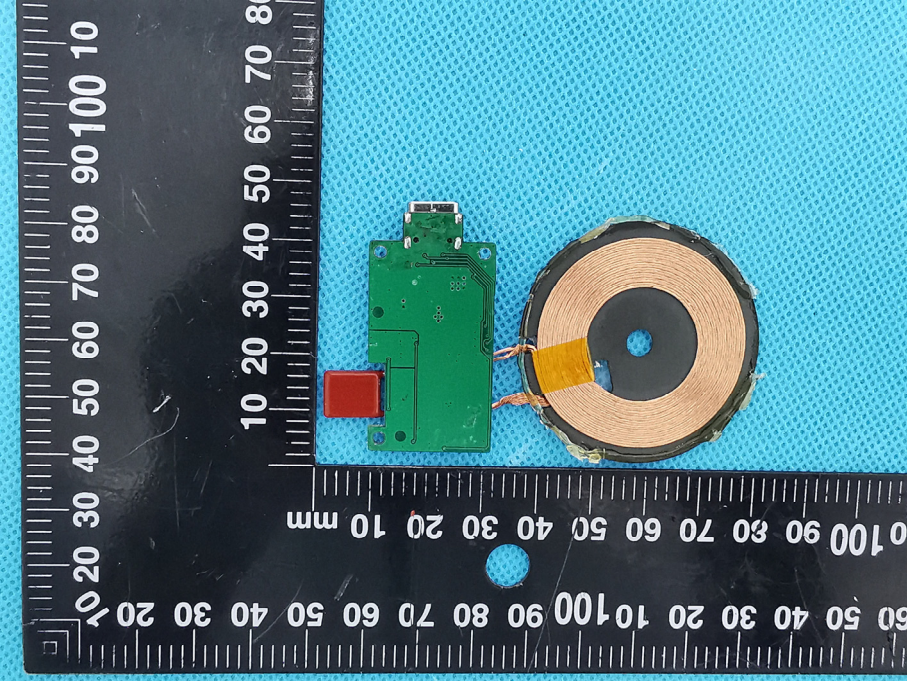

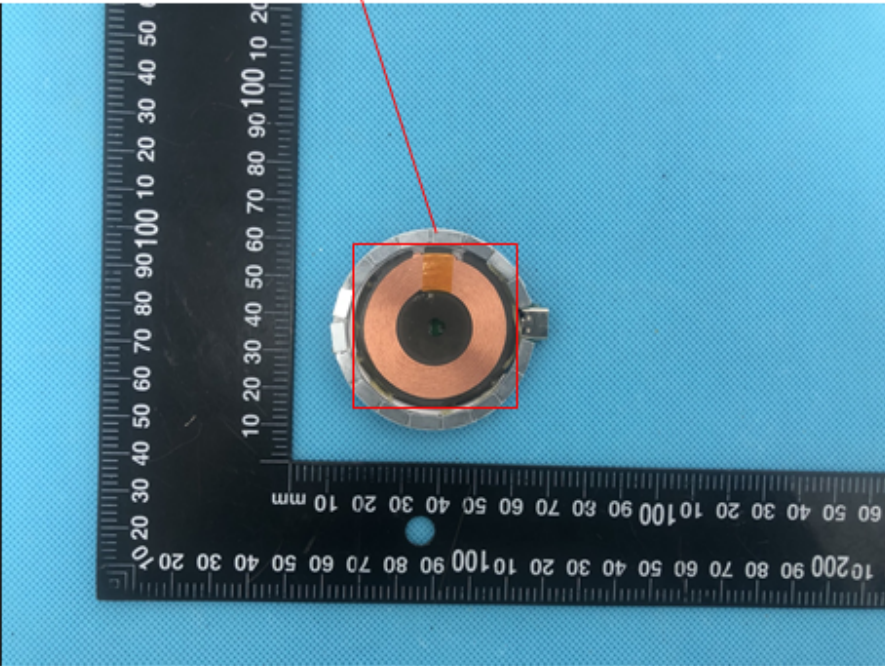

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p><b>EUT Housing and Board View 1</b></p>	 <p>A photograph showing two circular components on a blue textured surface. On the left is a silver-colored metal housing with a copper-colored inner ring and a black center. On the right is a plain white circular cap. A black L-shaped ruler is positioned below the components, with markings in millimeters. The ruler shows the components are approximately 20-30 mm in diameter.</p>
<p><b>Solder Board-Component View 1</b></p>	 <p>A close-up photograph of the silver-colored metal housing component from the previous view. It shows the copper-colored inner ring and the black center. A black L-shaped ruler is positioned below the component, with markings in millimeters. The component is approximately 20-30 mm in diameter.</p>

<p style="text-align: center;"><b>Solder Board-Component View 2</b></p>	 <p>A photograph showing a green printed circuit board (PCB) mounted on a white circular substrate. The PCB is oriented vertically and features a red component at the top. The assembly is placed on a blue textured surface. A black ruler with white markings is positioned to the left and bottom of the assembly, showing measurements in millimeters. The ruler markings are oriented vertically on the left and horizontally at the bottom.</p>
<p style="text-align: center;"><b>Solder Board-Component View 3</b></p>	 <p>A photograph showing a green PCB with various components, including a red component at the bottom, connected to a black circular substrate. Two thin wires are attached to the substrate. The assembly is placed on a blue textured surface. A black ruler with white markings is positioned to the left and bottom of the assembly, showing measurements in millimeters. The ruler markings are oriented vertically on the left and horizontally at the bottom.</p>

<p style="text-align: center;"><b>Solder Board-Component View</b> 4</p>	 <p>A photograph showing a green printed circuit board (PCB) component and a circular copper antenna coil. The PCB has a red component and a yellow ribbon cable. The antenna coil is connected to the PCB. A black ruler with white markings is placed below the components for scale. The background is a blue textured surface.</p>
<p style="text-align: center;"><b>Antenna View</b></p>	<p style="text-align: center;">Wireless Charger Antenna</p>  <p>A close-up photograph of the circular copper antenna coil. A red box highlights the coil, and a red line points from the text "Wireless Charger Antenna" to it. A black ruler with white markings is placed to the left of the antenna for scale. The background is a blue textured surface.</p>
