Power:
·In shutdown state, press and hold for 3 seconds to turn on.
·In power-on state, long press for 3 seconds to activate the shutdown options: Power off, Restart.
·Short press to turn off / on the screen.

Volume + / - : Press + / - to turn up/down the volume.

USB-C: Connect type-c cable for charging and file transfer.

Restart: Long press for 3 seconds with the pin, the device will be reboot.

Back: Click to come back to the previous page.

Home: Click to come back to homepage. Long press to open the background process management (Recently used apps), swipe left/right to remove the selected process.

SD slot: Expand storage of the device, maximum support 2 TB TF / Micro-SD card.

3.5mm output: Connect your headphones or external speakers as audio output.

1. Transfer from your computer:

·For Windows:

1) Use the included USB cable to connect the player to your computer. The computer will automatically recognize the device and install the driver. After the installation is successful, Click "My Computer", you will find an MTP device named "G1" in the list of devices and drives, click on it to access the player's internal/external SD card and its folders.

2) Copy the downloaded music or videos, e-books and other files from your computer and paste them into the target folder of "G1" device, just like using a normal USB flash drive.

·For MacOS:

1) Please download and install the MTP device file transfer software. The recommended software is as follows:
OpenMTP: https://openmtp.ganeshrvel.com/
MacDroid: https://www.macdroid.app/

2) Launch the installed OpenMTP or MacDroid software and follow the prompts to connect the player to the Mac device. You will find the device named "G1" and all its folders in the device list of the software.

3) Copy the downloaded music, videos, e-books and other files from the Mac device and paste them into the target folder of the device "G1".

2. Transfer from your phone:

·For Android:

Transfer music or videos from Android smartphone to the player requires the MiniShare app. Please scan the following QR code to download and install MiniShare.

Minishare for Android

① Android phone ⟹ G1 Player

    a. Click the "File transfer" icon on the desktop of the G1 player to open the MiniShare App. And click the ⇆ icon in the middle of the window to switch to Send/Receive mode, and then click the "Receive" icon, and the device will start hotspot and pop up a QR code for scanning.

    b. Open the MiniShare app on Android phone, also click the ⇆ icon in the middle of the window to switch to Send/Receive mode, and click the "Send" icon, then select the music and videos to be transferred, and click the "Send" button that pops up below. Next, you can find the avatar and name of G1 player in the search radar, click it to establish a connection and start transferring files (If you have set a hotspot password, you will be asked to enter it). If not found in the search radar, you can also click the "Scan QR Code" button below to activate the camera scanning, and scan the QR code of G1 player to establish a connection, and then

start to transfer files.

② Android phone ⇔ G1 Player

a. Click the "File transfer" icon on the desktop of the G1 player to open the MiniShare app. And click the 🖾 icon in the middle of the window to switch to Create Group/Join mode, and then click the "Create Group" icon, and the device will start hotspot and pop up a QR code for scanning.

b. Open the MiniShare app on Android phone, and also click the 🖾 icon in the middle of the window to switch to Create Group/Join mode, click the "Join Group" icon. Next, you can find the avatar and name of G1 player in the search radar, click it to establish a connection and start transferring files (If you have set a hotspot password, you will be asked to enter it). If not found in the search radar, you can also click the "Scan QR Code" button below to activate the camera scanning, and scan the QR code of

G1 player to establish a connection, and then start to transfer files.

Tips: In the Create Group/Join Group mode, multiple devices are allowed to join the same group to transfer files between each other.

·For MacOS:

Since IOS is a closed source system, the music stored on the iPhone cannot be transferred directly to the G1 player. You must first export the music to your computer from your iPhone with iTunes or other third-party software (such as iTools), and then transfer to the G1 player from your computer (please refer to the "Transfer from your computer" section).

* The pictures and videos in the Photos App can be transferred directly to the G1 player. Please refer to the FAQ section in the "File Transfer" chapter.

1. Know The Main Window of Music App

Click the Music app on the player's desktop to enter the main window. Here, there are 4 commonly used tabs for you to customize the function menu of the app, and manage songs and playlists. As below:

1) 👤 Including User login, Function menu, Settings, etc.

·**Import Music Via WiFi**: (only applicable to models with WiFi)Import music in batches from your computer and cellphone via WiFi. The player and the sending device must be under the same wifi.

·**Music scan**: Scan music in all folders or specific folders. Different scanning rules can be selected.

·**Equalizer**: Enable or disable equalizer, you can choose Pop, Blues, Classic, Jazz, Rock, Dance, Metal, Voice, Custom, etc.

·**MSEB**: enable/disable MSEB sound adjustment.

·**Plugins**: Add playback plugins.

·**Sleep timer**: Set the sleep time from 0 to 120 minutes, and once the set time is exceeded, it will stop playing music.

·**Settings**: More setting options can be found here, such as Show lyric, Resume play from last position, Font size, Language, Album cover display, etc.

·**Quick guide**: Guide you to operate the App

·**Exit**: Close and exit the music App

2) ♫ Manage your songs according to different categories. For example:

·**Title**: Show all local songs, including device internal storage and external SD card. And sort in alphabetical order by default.

·**Folder**: Show all local folders, including the device internal storage and external SD card. You can quickly access the target folder and add songs to the playlist in batches.

* If you want to display only the folders containing music, you can enable the "Filter non-music files and folders" item in "Music scan"

·**Album**: Organize songs by album name

·**Artist**: Organize songs by artist name

·**Genre**: Organize songs by their genre type

·**Album Artis**t: Organize songs by album + artist

3) ☰♪ Manage all your lists, including:

·**Favourite**: List all songs marked as Favourite.

·**Recently**: List those recently played songs

·**Playlist**: List all playlists you have created. Here you can click 🗋 to create a new playlist, or click 🖉 to import a playlist.

4) 🔍 Quickly search for Tracks, Artists, Albums or Genres.

Moreover, there are more shortcut menus under each song category to meet your different operating needs. For example:

1) ▶ **Shuffle all**: Click "Shuffle all" every time, it will refresh the shuffle sequence.

2) ☰ Click this icon under Title or Folder to activate the selection mode, and then click the check box in front of target files one by one to select it. Next, you can do in the shortcut bar at the bottom:

· ♫ Enqueue(next track) -- Assign the currently selected song as the next track.

· 🗒 Add to playlist -- Add the currently selected song to a specific playlist.

· ⟲ Send to -- Unavailable

· 🗑 Delete -- Delete the currently selected song

Note: To activate the selection mode under Album, Artist, Genre, Album Artist, long press any item under it.

3) Long press any item under Title or Folder, you can:

· ♫ Enqueue (next track) -- Assign the currently selected song as the next track.

· ☰♪ Enqueue (last track) -- Add the current song to the playback sequence.

· 🗒 Add to playlist -- Add the current song to the playlist.

· 🗐 Properties -- View the details of the current song

· 🗑 Delete track -- Delete the current song

· ◎ Show album info -- View the info of the album where the song is located.

· ⟲ Send to -- Unavailable

2. Know The Music Playing Window

Click the thumbnail bar at the bottom of the main window to access the music playing window. Here, you can view the album cover, lyrics, details (Samplerate, Bits, Bitrate, etc.), and control the playback process. The following are some commonly used keystrokes.

· ↻ -- Switch between the linear progress bar and the circular progress bar

· ⚲ --Shuffle all. Click it to switch to List loop, Loop single, Sequential play.

· Ⓐ --List loop

· ① --Loop single

· ⇒ --Sequential play

· ⋈ --Click to switch to the next song

· ⋈ --Click to switch to the previous song

· ▶/⏸ --Play/Pause

· ☰ --View the playlist of the current song.

· ⋮ --Enable shortcut menu: Add to playlist, Equalizer, Show album info, Properties, Obtain lyrics and cover art online

3.FAQ

1) How to create a playlist？
Click " ⬚ New playlist" in the "Playlist" of the list-tab ☰♪ , then enter the name you want, and click Ok·

2) How to add songs to the playlist？

5) 🗁 -- Click the" 🗁 Local File" button, you can view the photos, videos, and music in the local folder.
Here, you can also quickly share them with friends follow the steps below.
① Click the check-box behind the file to select the photo/video/audio that needs to be shared.
② Then click the "Share" button at the bottom of the window, a QR code will pop up and create a Group named after the device name.

③ Next, you have 2 ways to establish a connection to transfer files.

·Scan QR code: For iPhone, please install and open ZapyaGo app on your phone and scan the QR code. Then, click "Go to Settings" to jump to the WIFI settings of your iPhone, and set the currently connected WIFI to the hotspot of G1 (If you have set a hotspot password, you will be asked to enter it). Then return to ZapyaGo to start transfer; For Android phones, Please install and open MiniShare app on your phone and scan the QR code. The app will automatically start transferring files.

·Join in Group: For Android phones, open MiniShare and click the iconto switch to Group mode, then select "Join Group", you will find the group created by the G1 player in the search radar, click it to join (If you have set a hotspot password, you will be asked to enter it) and start transfer.

2. FAQ

1. How to get MiniShare or ZapyaGo App?

  ·For Android Cellphone
  Please scan the following QR code to
  download and install MiniShare.

Minishare for Android

  ·For iPhone
  Please search for "Zapya Go" in the
  App store or scan the following QR
  code to download and install.

Zapya Go for ipone

ZapyaGo can only be used to transfer pictures and videos those in the Photos App, not to directly transfer music from iPhone.

2. How to transfer files between cellphones and G1 players?

·For Android:
Please refer to the "Transfer from your phone" topic in the "How to Transfer Music or Video" section.

·For IOS:
① **iPhone⇒ G1 Player**
a. Click the "File transfer" icon on the

desktop of the G1 player to open the MiniShare App. And click the ⇔ icon in the middle of the window to switch to Send/Receive mode, and then click the "Receive" icon, and the device will start hotspot and pop up a QR code for scanning.

b. Open the ZapyaGo on iPhone, and also click the ⇔ icon in the middle of the window to switch to Send/Receive mode, click the "Send" icon, then select the photos or videos to be transferred, and click the "Send" button that pops up below. Next, click "Scan to connect now" in the pop-up window to activate the camera scanning function, and scan the QR code on G1 player.

c. According to the pop-up prompt, Click "Go to Settings" to jump to the WIFI settings of your iPhone, and set the currently connected WIFI to the hotspot of G1 (If you have set a hotspot password, you will be asked to enter it). Then return to ZapyaGo, and the app will starts uploading files to the player.

② **iPhone ⇔ G1 Player**

a. Click the "File transfer" icon on the desktop of the G1 player to open the MiniShare App. And click the ⚇ icon in the middle of the window to switch to Create Group/Join mode, and then click the "Create Group" icon, and the device will start hotspot and pop up a QR code for scanning.

b. Open the ZapyaGo on iPhone, and also click the ⚇ icon in the middle of the window to switch to Join mode, click the "Join" icon, Next, click "Scan to connect now" in the pop-up window to activate the camera scanning function, and scan the QR code on G1 player.

c. According to the pop-up prompt, Click "Go to Settings" to jump to the WIFI settings of your iPhone, and set the currently connected WIFI to the hotspot of G1 (If you have set a hotspot password, you will be asked to enter it). Then return to Zapya Go, The mutual connection is

successfully established. In this way, you can either transfer files from iPhone to the player, or transfer files from the player to iPhone.

In page of file manager, files have been classified by format, including Music, Videos, Picture, Apks, Document, Zips, Recent, Favorites, All. If a quick check needs, click to Search files.

·Languages & Input: Setting languages and input method.

·Date & Time: Setting time of device.

·Reset options: Network, apps, or device can be reset.

·About device: Detail information of device.

1. The player can't be charged.

In the off state, when the USB cable is connected for charging, The player will normally light up and display a battery logo and remaining charge.

Troubleshooting:

1) Check whether it is caused by poor contact.

In most cases, charging failure is caused by poor contact. You can repeatedly plug and unplug the USB cable to test whether the charging can be resumed. If it can be charged at a certain moment, it indicates that there is poor contact.

2) Check whether USB port is damaged

Connect the player to a computer with an available USB port by using a proven USB cable. If the fault persists, it indicates USB port of the player has been damaged.

3) Check if the USB cable is damaged.

·You can replace a proven USB cable to connect the player to check whether it can be charged. If it can, it means that the previous cable has been damaged.

·You can also use the USB cable to try to

charge other devices, such as cellphones, to check whether it can charge other devices. If not, it means also that the cable has been damaged.

If it is confirmed that both the USB cable and the charging port are normal, it can be determined that it is the fault of the player itself. Please contact after-sales support for replacement or refund.

Tips: If turned off and not used for a long time (more than 3 months or even longer), the player may not be able to turn on or be charged. This is usually an illusion caused by the device being in an over-discharge protection state, rather than a real failure. In this case, please make sure to charge it for at least 2 hours before trying to turn it on.

2. Nothing happens when the player is connected to computer with USB cable.

Usually, use a USB cable to connect the player to the computer, an MTP device named G1 will appear in the device and drive list of your computer.

Troubleshooting:

1) Check whether it is caused by poor contact. In most cases, such failure is caused by poor contact. You can repeatedly plug

and unplug the USB cable to test whether the connection can be resumed.

2) Check whether the USB port is damaged Connect the player to a computer with an available USB port by using a proven USB cable. If the fault persists, it means USB port of the player has been damaged

3) Check if the USB cable is damaged.
　·You can replace a proven USB cable to connect the player to Check if the connection can be restored. If it can, it means that the previous cable has been damaged.
　·You can also try to use the USB cable to connect other devices. If there is also no response, it means also that the USB cable has been damaged.

3. FM radio cannot be turned on.

The FM radio needs to be plugged into a wired headset/headphones as an antenna to turn on. If the headset is plugged in and the fault persists, it is likely that the 3.5mm port is in poor contact. Please replace one headset and try again.

4. I want to delete some unnecessary apps, how to do it?

Long press the App you want to delete on the desktop, next click on the "App info" or the icon ⓘ in the pop-up window, then select "UNINSTALL" and "OK.

Warning:
·Deleting the app is irreversible. Unless you reset the device to factory settings. Please be cautious.
·Some Android built-in APPs cannot be delete or uninstall, such as music, clock, calculator, etc.

5. How to take screenshots?

Press and hold the volume down button and the power button at the same time for 2 seconds. You can find your screenshots in Pictures--Screenshots in the device storage.

6. How to clear apps running in the background?

Long press the Home button of the device, and swipe right or left one by one in the pop-up application list to clear the program.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

--Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement.
